Aging and Adult Development in the Developing World Frank E. Eyetsemitan, James T. Gire, 2003-02-28 Most studies of human development in developing societies have focused on the childhood stage and in a few cases exploration has extended up to adolescence since this age group represents about half the population in developing societies The developed world however is experiencing a surge in the elderly population and this has spurred its study There is growing recognition that studies are needed in order to understand aging in all contexts and to discover how the experience may differ in developing and developed societies In this book the authors discuss the appropriateness or inappropriateness of applying Western theories and perspectives to studies of aging in the developing world The present study critically examines the major theories in the area of aging and adult development covering such domains as the physical psychological and social aspects of aging death and dying and social and public policies Applying the concepts of individualism and collectivism as well as the global and environmental dimensions of the developing world the authors have earmarked the theories that seem suitable only to the developed world and those that appear to be universally relevant **Families in Later Life** Alexis Walker, 2001-01-22 The introductory essays and readings drawn from both literature and social science research vividly illustrate the diversity of aging experiences both within and across American families diversity conditioned by social space historical time and individual biography Eleanor Palo Stoller Selah Chamberlain Professor of Sociology Case Western Reserve University *Families in Later Life* is the only textbook on the subject that addresses the diversity of aging experiences

in society by race gender and social class and in a form which combines insight from the humanities as well as the social sciences Includes a balance between empirical selections and literary pieces keeping students interested and engaged while still introducing them to solid research Every social science article included has been carefully edited so those students learn and enjoy their reading to the maximum extent possible Framing Essays by the Editors Questions for Discussion and a complete Index make this book even more useful for teaching

Gerontological Nursing Mary M. Burke, Susan Sherman, 1993 This book makes a compelling argument for an immediate and comprehensive shift in the nursing education curriculum from an acute care to a gerontological nursing care focus It is important reading for deans and faculty in schools of nursing administrators in long term care facilities and community health agencies and for practicing nurses caring for the elderly

Remainder of Their Days Carolyn J. Rosenthal, Jon Hendricks, 2021-04-14 First published in 1993 This present volume co edited by two sociologists Jon Hendricks of the United States and Carolyn Rosenthal of Canada focuses on a comparative cross national discussion of social policies of the United States and Canada especially those related to health care The uniqueness of this work lies in the fact that it views family experiences from both a Canadian and an American perspective In addition this book not only fills a gap in our knowledge of social policies but contributes to our understanding of how these policies shape and effect the lives of older families in both countries

Voices and Visions of Aging Robert Kastenbaum, PhD, Thomas R. Cole, PhD, W. Andrew Achenbaum, PhD, Patricia L. Jakobi, PhD, 1992-11-15 A critical gerontology requires more than a simple elaboration of existing humanistic scholarship on aging This exceptional new work introduces a basis for genuine dialogue across humanistic scientific and professional disciplines Among the topics addressed are industrial employment retirement life styles of older women and biological research From philosophical reflections on the third age to critical perspectives on institutional adaptations to an aging society this book presents a wide range of provocative thought
