

Rita Levi Montalcini

**Josef Donnerer**

## **Rita Levi Montalcini:**

**Rita Levi-Montalcini** Susan Tyler Hitchcock,2009 Examines the life of Rita Levi Montalcini a woman scientist who won the Nobel Prize for her research in neurology      **Rita Levi-Montalcini** Barbera Foundation,Francesca Valente,2021

**Rita Levi-Montalcini** Lisa Yount,2009 As a woman growing up in early 20th century Italy Rita Levi Montalcini was expected to marry not pursue an education Against the objections of her father she attended Turin School of Medicine graduating with honors as an M D But her hopes of an academic position vanished with the fascist Italian government's persecution of the Jews in the late 1930s and early 1940s At the risk of her own life Levi Montalcini continued studying how the body's nervous system develops and discovered the nerve growth factor a protein that controls the growth of neurons and is required for their survival Building upon her findings she and a host of other researchers unearthed a whole class of compounds that are intimately involved in every stage of a cell's or an organism's life from conception to death Today scientists are still exploring the implications of her work from cancer treatments to Alzheimer's disease management to research on birth defects and more As Rita Levi Montalcini shows this woman's incredible persistence and faith in herself allowed her to persevere through tough opposition and earn a Nobel Prize in Physiology or Medicine in 1986      **Rita Levi-Montalcini: Pioneer and Ambassador of Science** Francesca Valente, My experience in childhood and adolescence of the subordinate role played by the female in a society run entirely by men had convinced me that I was not cut out to be a wife Rita Levi Montalcini Self assured from an early age Rita knew that she was cut out for a number of other roles and the difference she could make in the lives of others Prevailing over her father's traditional values Rita attended medical school and continued to study the development of the nervous system after graduating But as a Jew in fascist Italy her work came to a halt with discriminatory race laws and again later when she was forced into hiding from the Nazis In a makeshift lab built from black market items Rita continued her research in a small space she shared with her family Rita's courage to accept a fellowship in the United States when she didn't speak the language was repaid when her six month stay stretched into thirty three years When at seventy seven years old she and Stanley Cohen won the Nobel Prize for their discovery of nerve growth factor now used in search of cures for Alzheimer's and Parkinson's diseases Rita felt like her life was just beginning Over the next two decades she spoke around the globe as an ambassador for science and humanitarianism and accomplished more than most do during an entire lifetime      *Rita Levi-Montalcini: Nobel Prize Winner* Susan Tyler Hitchcock,2005      **Rita Levi-Montalcini** Alex K Rich,2006      **Rita Levi-Montalcini--Autobiography** , The Nobel Foundation presents autobiographical information on American neurobiologist Rita Levi Montalcini 1909 Levi Montalcini received the 1986 Nobel prize for physiology or medicine along with Stanley Cohen for their discoveries of growth factors The foundation highlights her career her education and her work      **Rita Levi-Montalcini** Lisa Yount,2021 As a woman growing up in early 20th century Italy Rita Levi Montalcini was expected to marry not pursue an education      **In Praise of Imperfection** Rita

Levi-Montalcini, Diane Gnagnarelli, Sound Writings (Firm), 1991

## **The Biographical Dictionary of Women in Science:**

**L-Z** Marilyn Bailey Ogilvie, Joy Dorothy Harvey, 2000 Volume 2 of 2

*Bioprinting* Kenneth Douglas, 2021-04-30 Of the 121 000 people on donor lists in the U S over 100 000 need kidney transplants and thousands die each year while waiting Bioprinting aspires to build healthy kidney tissue from a patient's own cells and transplant this to boost failing kidneys without fear of rejection As the 21st century dawned a handful of inspired scientists tried to use 3D printing to create living human tissue Their vision was to restore the health of people with intractable injuries such as worn out cartilage severed nerves ailing kidneys failing hearts the gamut of human frailties Their modest success energized others to join the quest Now after two decades of ingenious effort and hard work they have carved out a vibrant new discipline bioprinting In *Bioprinting To Make Ourselves Anew* physicist Kenneth Douglas casts an eye over the achievements and future of bioprinting He explains the science with rigor but with a minimum of technical baggage This is the first book on the subject written expressly for the lay audience accessible and even entertaining Douglas interviewed two dozen bioprinting researchers from around the world and he enriches the narrative by sharing stories from the scientists behind the science These contemporary vignettes are complemented by historical accounts of the women and men whose prescient contributions were foundational to the development of bioprinting The book describes the challenges and accomplishments in the bioprinting of blood vessels cartilage skin bone skeletal muscle neuromuscular junctions liver heart lung kidney and so called organs on a chip as well as the challenges of providing a blood supply and nerves to bioprinted tissues This is a compelling tale of a work in progress to imitate nature and help heal people with debilitating afflictions *Women in Neuroscience* Marie-Ève Tremblay, Corette J. Wierenga, Elizabeth B. Torres, Liana Fattore, Arianna Maffei, Michela Chiappalone, 2022-11-04

## **Women Scientists**

Magdolna Hargittai, 2015 A compilation of sixty biographical sketches of influential female scientists discussing topics like the state of the modern female scientist and the underrepresentation of women at the higher levels of academia **Great**

**Minds** Balazs Hargittai, Magdolna Hargittai, Istvan Hargittai, 2014-05-01 Throughout the 1990s and the 2000s Istvan Balazs and Magdolna Hargittai conducted hundreds of interviews with leading scientists in physics chemistry materials and biomedical research These interviews appeared in a variety of publications including *Chemical Intelligencer* *Mathematical Intelligencer* and *Chemical Heritage* In four thousand pages of interviews the Hargittais had conversations with over a hundred Nobel laureates along with many other top minds and personalities in various scientific fields Now in a single volume the Hargittais have gathered the best and most notable moments of these interviews creating a survey of the past present and future of science as told by some of the most influential members of many scientific disciplines Figures like James D Watson Francis Crick and Glenn T Seaborg share their thoughts in these pages in a collection that includes 68 Nobel Laureates Without exaggeration their backgrounds come from all over the globe scientists from the United States the United Kingdom Canada France Germany Israel Russia Sweden Switzerland and Taiwan are featured These interviews discuss many

of the most prominent debates and issues in today's scientific climate Great Minds is a synthesis of scientific thought as told by some of the most notable scientists of the twentieth and twenty first centuries *In Praise of Imperfection* Rita Levi-Montalcini,1988 The author a Nobel Prize winning scientist recounts her childhood in Italy her survival during the rise of Fascism and her biological research in the U S

**The Chemical Languages of the Nervous System** Josef Donnerer,2006-01-01 Neurochemical transmission accounts for the majority of information transfer both in the central and peripheral nervous system The initial findings centred around the experimental work of the two Nobel Prize winners Sir Henry H Dale and Otto Loewi as well as Wilhelm Feldberg Their historical findings opened the door to further investigations and extended the list of neurotransmitters to many others such as amino acids peptides purines and nitric oxide In the first part the publication provides fascinating insights into the life of the three scientists Their personality and scientific approach are presented through autobiographical sketches and personal memories by authors Various comments and details of the atmosphere in the laboratory complete the picture of the conditions at the time The second part is dedicated to the history of the substances such as neurotransmitters their antagonists and analogues The stories of these substances are presented to the reader in a succinct way including many anecdotes and unusual events on the way to their therapeutic application

Contents Preface Introduction Otto Loewi Otto Loewi Introductory Remarks Autobiographic Sketch By O Loewi Otto Loewi 1873 1961 By H H Dale Otto Loewi By F Brucke Loewi's Time in Graz Comment on Loewi's Dream An Overlooked Parallel to Kekule's Dream The Discovery of the Chemical Transmission of Nerve Impulses by Otto Loewi By U Weiss and R A Brown The Loewi Family's Way to the New World Comment on the Film Nobelpreisträger Otto Loewi Henry Hallett Dale Henry Hallett Dale Introductory Remarks Henry Hallett Dale 1875 1968 By W Feldberg Fifty Years after the Nobel Prize Award to H H Dale and Otto Loewi By G B Koelle Religious Reflections of Dale and Loewi Wilhelm Feldberg Wilhelm Feldberg Introductory Remarks The Early History of Synaptic and Neuromuscular Transmission by Acetylcholine Reminiscences of an Eye Witness By W Feldberg From the History of Scientists to that of Neurotransmitters A Substance Isolated from Brain Synthesized and Called Neurin Acetylcholine Adrenaline Noradrenaline and Dopamine The Catecholamines Enteramine and Serotonin Two Names and Three Functions of 5 Hydroxytryptamine Histamine One Substance and Three Functions The Amino Acid Transmitter Family A Cloud of Peptides Substance P Calcitonin Gene Related Peptide Neuropeptide Galanin and Vasoactive Intestinal Polypeptide Opioid Peptides Nitric Oxide ATP and Adenosine Peripheral Neurogenic Stimulators Neurotransmission in the Central Nervous System From Transmitter to Receptor Progress within 50 Years The Better Half Sharon Moalem,2020-04-07 A Guardian Book of the Week Longlisted for the PEN E O Wilson Literary Science Writing Award An award winning physician and scientist makes the game changing case that genetic females are stronger than males at every stage of life Here are some facts Women live longer than men They have stronger immune systems They are better at fighting cancer and surviving famine and even see the world in a wider variety of colors They are simply stronger

than men at every stage of life Why is this And why are we taught the opposite To find out Dr Sharon Moalem drew on his own medical experiences treating premature babies in the neonatal intensive care unit recruiting the elderly for neurogenetic studies tending to HIV positive orphans in Thailand and tried to understand why in every instance men were consistently less likely to thrive The answer he discovered lies in our genetics two X chromosomes offer a powerful survival advantage With clear captivating prose that weaves together eye opening research case studies diverse examples ranging from the behavior of honeybees to American pioneers as well as experiences from his personal life and his own patients Moalem explains why genetic females triumph over males when it comes to resiliency intellect stamina immunity and much more He also calls for a reconsideration of our male centric one size fits all view of medical studies and even how we prescribe medications a view that still sees women through the lens of men Revolutionary and yet utterly convincing *The Better Half* will make you see humanity and the survival of our species anew *Great Minds in Despair* Frank W. Stahnisch, 2025-07-29

The twentieth century witnessed two devastating world wars that led to the exodus of millions of people Counted among them were hundreds of neuroscientists and biological psychiatrists from Nazi Germany and its surrounding countries who were forced to emigrate in the 1930s and 1940s Many of them settled in North America where they profoundly influenced the development of the biomedical sciences Focusing on the years between 1933 and 1989 *Great Minds in Despair* examines the long term effects of this forced migration on scientific and medical cultures in North America and on the researchers themselves Frank Stahnisch traces the lives and careers of approximately four hundred German speaking doctors scientists and researchers over two generations Placed in unfamiliar research settings in Canada and the United States they helped to build the fields of neuroscience psychiatry clinical psychology and the cognitive sciences even as they rebuilt their own lives amid myriad challenges including cultural adaption and the complications of relicensing Stahnisch explores how generational factors gender international networking refugee organizations and national funding agencies shaped their experiences and affected postwar remigration *Great Minds in Despair* provides an important revision to the brain gain thesis in migration studies by turning attention to the working conditions and social acculturation of an influential academic refugee group in North America **International Women in Science** Catherine M.C. Haines, 2001-11-20

A comprehensive biographical guide to the scientific achievements personal lives and struggles of women scientists from around the globe *International Women in Science A Bibliographical Dictionary to 1950* presents the enormous contributions of women outside North America in fields ranging from aviation to computer science to zoology It provides fascinating profiles of nearly 400 women scientists both renowned figures like Florence Nightingale and Marie Curie and women we should know better like Rosalind Franklin who along with James Watson and Francis Crick uncovered the structure of DNA Students and researchers will see how the lives of these remarkable women unfolded and how they made their place in fields often stubbornly guarded by men overcoming everything from limited education and professional

opportunities to indifference ridicule and cultural prejudice to outright hostility and discrimination Included are a number of living scientists many of whom provide insights into their lives and scientific times Those contributions plus additional previously unavailable material make this a volume of unprecedented scope and richness The Birth of Modern Neuroscience in Turin Lorenzo Lorusso,2022 The Birth of Modern Neuroscience in Turin explores both the famous and the lesser known history of the inception of what we know as modern neuroscience The pioneering contributions of neuroscientists from Turin and working in Turin and how they shaped the national and international community are critically explored

Eventually, you will utterly discover a further experience and completion by spending more cash. yet when? reach you believe that you require to acquire those every needs in the same way as having significantly cash? Why dont you attempt to get something basic in the beginning? Thats something that will guide you to understand even more on the order of the globe, experience, some places, gone history, amusement, and a lot more?

It is your certainly own times to perform reviewing habit. accompanied by guides you could enjoy now is **Rita Levi Montalcini** below.
