animal infectious diseases caused by nematode parasites of the order Filariidae. Often neglected, it is one of the oldest and the most debilitating tropical diseases. NTDs transmitted from human to human by mosquito bites, particularly the brown black mosquito known as *Culex quinquefasciatus*. LF is a major public health problem in many parts of the tropics, especially India, which accounts for as much as 40% of total global cases. As a leading cause of permanent and long-term disability worldwide, the parasite infection imposes a severe physical and socioeconomic burden. The World Health Organization (WHO) estimates that 1.4 billion people live in high-risk areas, 120 million of which are already infected with LF, including 22 million children below the age of 15 and about 76 million who suffer from damaged lymphatic and renal systems. India has made great strides toward eliminating the disease, and these advances are of global significance. They include early diagnosis mechanisms, vaccine product development, detection of parasites in the vector, and studies on parasite evolution, trends in nature, and warning signals. Reports on the successes and failures are needed to enable measures to be taken to avoid disaster and ensure a smooth transition from endemicity in India to the elimination of lymphatic filariasis by 2020. This book, which gathers highly original contributions on various subjects related to lymphatic filariasis, discusses the latest scientific research that will help the nation to achieve this milestone. It also serves as a guide to many other countries struggling against this highly debilitating and incapacitating disease.

**Lymphatic Filariasis**. Trilok Chandra Goel, Apul Goel, 2016-12-21. This book provides up-to-date information on lymphatic filariasis, supported with abundant images, tables, and algorithms. It is a first such monograph on a disease that has varied presentations, which are complete clinical entities such as chyluria, hydrocele, elephantiasis, etc. This book consists of three parts: parasitology, acute clinical manifestations, and chronic presentations of the disease. Approximately 120 million people are infected with lymphatic filariasis in tropical and subtropical countries. About a third of these suffer clinical consequences of this infection, and many are seriously disfigured. India, Indonesia, and Nigeria are the most endemic countries in the world. In spite of the Global Control Program of WHO, filariasis continues to be a significant medical challenge, and current efforts underway will take a long time to bring it under control. Lymphatic Filariasis is meant for general surgeons, physicians, urologists, and plastic surgeons, including postgraduate students. Useful for epidemiologists, internists, and those involved in filariasis prevention programs.

**The Filaria**. Thomas R. Klei, T.V. Rajan, 2002-05-31. Filarial nematodes constitute an important group of human pathogens in tropical regions of the world. Diseases associated with these worms are generally separated into two categories: filariasis caused by infections of lymphatic-dwelling parasites and onchocerciasis or river blindness caused by infections of *Onchocerca volvulus*. Other filariae specifically infect humans, and it is likely that zoonotic filarial infections may alter the outcome of infections with human parasites. The chapters in this book will cover concepts that in most instances overlap all of these parasites as well as focus

on new and emerging ideas The Filaria volume five of World Class Parasites is written for researchers students and scholars who enjoy reading research that has a major impact on human health or agricultural productivity and against which we have no satisfactory defense It is intended to supplement more formal texts that cover taxonomy life cycles morphology vector distribution symptoms and treatment It integrates vector pathogen and host biology and celebrates the diversity of approach that comprises modern parasitological research     **Lymphatic Filariasis** WHO Expert Committee on Filariasis.
