pulmonology immunology and allergology *Differential Algebraic Groups of Finite Dimension* Alexandru Buium, 2006-11-15
Differential algebraic groups were introduced by P Cassidy and E Kolchin and are roughly speaking groups defined by algebraic differential equations in the same way as algebraic groups are groups defined by algebraic equations The aim of the book is two fold 1 the provide an algebraic geometer s introduction to differential algebraic groups and 2 to provide a structure and classification theory for the finite dimensional ones The main idea of the approach is to relate this topic to the study of a deformations of not necessarily linear algebraic groups and b deformations of their automorphisms The reader is assumed to possess some standard knowledge of algebraic geometry but no familiarity with Kolchin s work is necessary The book is both a research monograph and an introduction to a new topic and thus will be of interest to a wide audience ranging from researchers to graduate students Real Options In Energy And Commodity Markets Nicola Secomandi, 2016-11-28

The field of real options is concerned with the management and financial valuation of operational flexibility in business endeavors From the very outset energy and commodity markets which play fundamental roles in the worldwide economy have provided a relevant context for real option analysis both in theory and practice This volume is a collection of six chapters covering recent research on real options in energy and commodity markets reflecting the significance of these markets for real option analysis The volume is divided into two parts the first on theory and the second on methods and applications The two chapters in the first part of the book respectively address commodity storage and the concept of convenience yield and how the management of real options can be impacted by the trader s own market decisions in the context of commodity shipping The four chapters in the second part of the book propose and apply real option models in various domains modeling the evolution of futures prices of emission certificates managing copper extraction illustrated with an application to a project at Codelco Chile the largest copper producer in the world the core ideas behind real option analysis in the context of the merchant management of hydrocarbon cracking operations and optimizing the portfolio of contracts that oil refineries use to market their gasoline production Sequences of Proteins of Immunological Interest

, 1991 **Current Trends in Monoclonal Antibody Development and Manufacturing** Steven J. Shire, Wayne Gombotz, Karoline Bechtold-Peters, James Andya, 2009-11-11 Monoclonal antibodies represent one of the fastest growing areas of new drug development within the pharmaceutical industry Several blockbuster products have been approved over the past several years including Rituxan Remicade Avastin Humira and Herceptin In addition over 300 new drugs are currently in clinical trials With both large established biotechnology companies and small start ups involved in the development of this important class of molecules monoclonal antibodies products will become increasingly prevalent over the next decade Recently the regulatory review of monoclonal antibodies has been moved from Center for Biologics and Research to the Center for Drug Evaluation and Research CDER division of the US Food and Drug Administration It is anticipated that CDER will expect a certain minimal amount of data to be provided as more of these products move through

the regulatory pipeline Current Trends in Monoclonal Antibody Development and Manufacturing will provide readers with an understanding of what is currently being done in the industry to develop manufacture and release monoclonal antibody products and what will be required for a successful regulatory submission
