Magnetic Materials Chen Wu, Jiaying Jin, 2022-08-12 The book aims to provide comprehensive and practical guidance on magnetism and magnetic materials. It involves four parts focusing on fundamental magnetism, hard magnetic materials, soft magnetic materials, and other functional magnetic materials. Part I highlights the ubiquity of magnetism and the close relationships between magnetic materials and our daily life. Perspectives on magnetism from Engineering and Physics are provided to introduce the two unit systems followed by the origin and categories of magnetisms. An introduction of important parameters during magnetization and magnetic measurement techniques are then provided to lay a solid foundation for the readers for better understandings of the design and development of different magnetic materials. Important magnetic materials are then introduced in the subsequent parts, delivering an overview of design principles, production technologies, research developments, and real world applications. For instance, rare earth free and rare earth based hard magnetic materials as well as soft magnetic materials such as Fe based alloys, composites, and ferrites are discussed. Other functional magnetic materials span a wide range involving smart materials with magneto X effects together with magnetic materials for applications including electromagnetic wave absorption, biomedicine, and catalysis, etc. For these magnetic materials, more emphasis is placed on the latest advances and interdisciplinary perspectives.

Additive Manufacturing of Magnetic Materials Moataz Attallah, Abdelmoez Hussein, 2025-08-01 Additive Manufacturing of Magnetic Materials: Techniques, Materials, Applications, Opportunities, and Challenges outlines different 3D printing techniques that can be employed to create an array of different magnetic materials along with how these materials can be effectively applied. The book discusses the additive manufacturing (AM) of soft magnets, permanent hard magnets, 4D magnetic shape memory alloys, magnetocaloric materials, and rare earth based magnetic alloys.
