Magnetohydrodynamics A Symposium:

Magnetohydrodynamics Sergei S. Molokov, R. Moreau, H. Keith Moffatt, 2007-08-26 Magnetohydrodynamics MHD studies the interaction between the flow of an electrically conducting fluid and magnetic fields. It involves such diverse topics as the evolution and dynamics of astrophysical objects, thermonuclear fusion, metallurgy, and semiconductor crystal growth, etc. Although the first ideas in magnetohydrodynamics appeared at the beginning of the last century, the explosion in theoretical and experimental studies occurred in the 1950s-60s. This state-of-the-art book aims at revising the evolution of ideas in various branches of magnetohydrodynamics: astrophysics, earth and solar dynamos, plasmas, MHD turbulence, and liquid metals, and reviews current trends and challenges. *Plasma Physics and Magnetohydrodynamics in Space Exploration* NASA-University Conference on the Science and Technology of Space Exploration, NASA-University Conference on the Science and Technology of Space Exploration, Chicago, 1962, 1963. *Engineering Aspects of Magnetohydrodynamics; 12th Symposium*, 1972. **Magnetohydrodynamics with Hydrodynamics** Peter C. Kendall, Charles Plumpton, 2013-09-03 Magnetohydrodynamics with Hydrodynamics Volume 1 details various concepts in magnetohydrodynamics as it relates to hydrodynamics. The title first covers the methods and techniques appropriate to an elementary discussion of magnetohydrodynamics and then proceeds to tackling the fundamental results of fluid dynamics. Next, the selection discusses the electromagnetic effects along with the motion of a fluid in a uniform magnetic field. In the last chapter, the text talks about steady states and equilibrium configuration. The book will be of great interest to students, researchers, and practitioners of physics and engineering. **Plasma Physics and Magnetohydrodynamics**, 1963. **Nuclear Science Abstracts**, 1974. **Energy: a Continuing Bibliography with Indexes**, 1974. *Magnetohydrodynamics (MHD)*. A. Früngel, 2014-05-12 High Speed Pulse Technology Volume 1 Capacitor Discharges Magnetohydrodynamics X-Rays Ultrasonics deals with the theoretical and engineering problems that arise in the capacitor discharge technique. This book discusses the characteristics of dielectric material, symmetrical switch tubes with mercury filling, and compensation conductor forms. The transformed discharge for highest current peaks, ignition transformer for internal combustion engines, and X-ray irradiation of subjects in mechanical motion are also elaborated. This text likewise covers the transformed capacitor discharge in welding engineering, application of strong magnetic shock fields in nuclear physics, and shock sound by underwater capacitor discharges. Other topics include the shaping of metals by electrical explosion, shock wave, and electro-erosion machining of metals. This volume is recommended for electrical engineering and physics students. **Energy**, 1968. **Magnetohydrodynamics Power Generation and Theory**, 1975. *Bibliography on Magnetohydrodynamics, Plasma Physics and Controlled Thermonuclear Processes*, 1959. **Guide to Annual Subject**

Moreau, 2012-12-06 Liquid metal MHD is within the scope of two series of international conferences One is the International Congress on MHD Power Generation held every four years which includes technical and economical aspects as well as scientific questions The other is the Beer Sheva Seminar on MHD Flows and Turbulence held every three years in Israel In addition to these well established meetings an IUTAM Symposium was previously organized in Cambridge UK in 1982 on Metallurgical Applications of MHD by the late Arthur Shercliff It was focussed on a very specific subject developing rapidly from the middle of the 1970 s The magnetic field was generally AC including frequencies high enough for the skin depth to be much smaller than the typical length scale of the liquid pool And the development of new technologies or the improvement of existing ones was the main justification of most of the researches presented and discussed Only two participants from Eastern countries attended this Symposium By the middle of the 1980 s we felt that on this very same topic ideas had reached much more maturity than in 1982 We also realized that a line of research on MHD flows related to fusion reactors tokamaks was developing significantly with particular emphasis on flows at large interaction parameter Space Scientists and Engineers: Selected Biographical and Bibliographical Listing United States.
