

A GUIDE TO THE MAILLARD REACTION

The Maillard reaction occurs during cooking, and it is responsible for the non-enzymatic browning of foods when cooked. It actually consists of a number of reactions, and can occur at room temperature, but is optimal between 140-165°C. The Maillard reaction occurs in three stages, detailed here.

1

The carbonyl group on a sugar reacts with a protein or amino acid's amino group, producing an N-substituted glycosylamine.

2

The glycosylamine compound generated in the first step isomerises, by undergoing Amadori rearrangement, to give a ketosamine.

3

The ketosamine can react in a number of ways to produce a range of different products, which themselves can react further.

Classes of Maillard Reaction Products

The Maillard reaction produces hundreds of products; a small subset of these contribute to flavour and aroma, some groups of which are described below. Melanoidins are also formed; brown, polymeric substances which contribute to the colouration of many cooked foods.

Maillard Reaction H E Nursten, 2007-10-31 Research in the field of the Maillard reaction has developed rapidly in recent years as a result of not only the application of improved analytical techniques but also of the realisation that the Maillard reaction plays an important role in some human diseases and in the ageing process The Maillard Reaction Chemistry Biochemistry and Implications provides a comprehensive treatise on the Maillard reaction This single author volume covers all aspects of the Maillard reaction in a uniform co ordinated and up to date manner The book encompasses the chemistry of non enzymic browning recent advances colour formation in non enzymic browning flavour and off flavour formation in non enzymic browning toxicological aspects nutritional aspects other physiological aspects other consequences of technological significance implications for other fields non enzymic browning due mainly to ascorbic acid caramelisation inhibition of non enzymic browning in foods and inhibition of the Maillard reaction in vivo The Maillard Reaction Chemistry Biochemistry and Implications will be welcomed as an important publication for both new and experienced researchers who are involved in solving the mysteries and complexities of Maillard chemistry and biochemistry It will also appeal to students university lecturers and researchers in a variety of fields including food science nutrition biochemistry medicine pharmacology toxicology and soil science

Chemistry of Maillard Reactions in Processed Foods Salvatore Parisi, Weihui Luo, 2018-06-29 This SpringerBrief explains the importance of Maillard reactions in food processing It underlines that the term Maillard reaction actually does not describe one single chemical reaction but an entire class of chemical reactions which lead to browning with a strong impact on visual appearance odor and flavor It emphasizes that the Maillard reactions are still not fully characterized despite extensive historical studies While under the right conditions Maillard reactions have many favorable effects e g formation of antioxidants the Brief discusses that there are also conditions where Maillard reactions can result in toxic or mutagenic reactions Hence it emphasizes that the reaction should be viewed as a complex network of various sub reactions with a plethora of concomitant reaction mechanisms and kinetics This Brief thus makes a step toward a holistic evaluation of the complexity of the Maillard reaction scheme with the aim of making better and more targeted use in food processing

Maillard Reactions in Food C. Eriksson, 1981 The Maillard Reaction in Food Chemistry Dongliang Ruan, Hui Wang, Faliang Cheng, 2018-11-27 This book is devoted to the characterization of Maillard reaction products using mass spectrometry MS based technologies The Maillard reaction is a well known non enzymatic reaction between reducing sugars and proteins and one of the most important reactions in food sciences The authors explore different MS based technologies to systematically investigate the Maillard reaction from amino acids peptides and proteins By using amino acid peptide sugar models the authors also show how reactants temperature and time affect the Maillard reaction In this book readers will learn more about glucosylation and how it can improve functional properties of food proteins

Maillard Reaction Merlin C Thomas, Josephine Forbes, 2010-09-24 In September 2009 a

meeting was held in Palm Cove Australia which brought together the world experts in the Maillard or browning reaction. This reaction causes the browning of foods when they are heated and in chocolate caramel and beer this reaction is appetizing contributing to aroma taste and texture. But when these products accumulate in the body this same process contributes to disease and ageing. The book is the proceedings of that meeting held in response to a growing recognition of the role reactive carbonyl compounds play in food technology nutrition and tissue ageing in biology and medicine. Reactive carbonyls now touch every aspect of food science biology and medicine. Efforts to counteract the damage caused by these products are gaining acceptance as a basis for novel therapeutic approaches and the fields of food technology ageing and preventive medicine are experiencing an upsurge of interest in strategies to minimize the unwanted effects of the Maillard reaction. The meeting also fostered a balanced approach to understanding both the advantageous and deleterious properties of carbonyl compounds and their end products in food science technology and medicine. The major audience of this book is the large body of scientists and worldwide industries with an interest in the Maillard reaction in foods and biology and medicine with both basic and applied researchers and industry representatives from diverse fields who have interests in Chemistry of the Maillard Reaction Biology and the Maillard Reaction Enzymology Receptors and Signal Transduction Bioinformatics and Systems Biology Physiology Disease and Therapeutics Food Science and Nutrition and the Maillard Reaction.

Maillard Reaction Sian E Fayle, Juliet A Gerrard, 2007-10-31 It is almost 100 years since the Maillard reaction was first described. Despite decades of research since then the products of the reaction and the mechanistic pathways leading to their formation are only gradually being unravelled. Combining comprehensive information regarding the various methods that can be employed in the analysis of Maillard products with a discussion of the advantages and limitations of those methods this unique book provides a one stop text from which methods of analysis may be obtained. It will be useful for both new and experienced researchers who are involved in solving the mysteries and complexities of Maillard chemistry.

The Maillard Reaction in Foods and Nutrition George R. Waller, 1983 Abstract Various aspects of the Maillard reaction a non enzymatic reaction that gives food its flavor and color during frying roasting and baking are discussed for food scientists and nutritionists in 29 technical papers. The papers are organized into 7 sections covering historical development chemical aspects 6 papers flavors tastes and odors of cooked foods 6 papers food technology aspects 3 papers nutritional aspects with emphasis on lysine losses 6 papers in vivo Maillard reactions 2 papers and toxicological aspects with emphasis on mutagen production 5 papers. A literature review of the sensory properties of almost 450 Maillard reaction products is included.

Maillard Reactions in Chemistry, Food and Health T P Labuza, V Monnier, J Baynes, J O'Brien, 1998-01-01 The Maillard reaction was originally studied due to its importance in foods. Lately it has been found to play a key role in many health related issues. It is now associated with diabetes ageing and cancer. The 5th International Symposium on The Maillard Reaction was held at the University of Minnesota USA in August 1993. This volume of conference proceedings presents recent
