Pioneering Women in American Mathematics Judy Green, Jeanne LaDuke, 2009 More than 14 per cent of the PhD s awarded in the United States during the first four decades of the twentieth century went to women a proportion not achieved again until the 1980s This book is the result of a study in which the authors identified all of the American women who earned PhD s in mathematics before 1940 and collected extensive biographical and bibliographical information about each of them By reconstructing as complete a picture as possible of this group of women Green and LaDuke reveal insights into the larger scientific and cultural communities in which they lived and worked The book contains an extended introductory essay as well as biographical entries for each of the 228 women in the study The authors examine family backgrounds education careers and other professional activities They show that there were many more women earning PhD s in mathematics before 1940 than is commonly thought Extended biographies and bibliographical information are available from the companion website for the book The material will be of interest to researchers teachers and students in mathematics history of mathematics history of science women s studies and sociology The data presented about each of the 228 individual members of the group will support additional study and analysis by scholars in a large number of disciplines

History and Philosophy of Modern Mathematics William Aspray, Philip Kitcher, 1988 History and Philosophy of Modern Mathematics was first published in 1988 Minnesota Archive Editions uses digital technology to make long unavailable books once again accessible and are published unaltered from the original University of Minnesota Press editions The fourteen essays in this volume build on the pioneering effort of Garrett Birkhoff professor of mathematics at Harvard University who in 1974 organized a conference of mathematicians and historians of modern mathematics to examine how the two disciplines approach the history of mathematics In History and Philosophy of Modern Mathematics William Aspray and Philip Kitcher bring together distinguished scholars from mathematics history and philosophy to assess the current state of the field Their essays which grow out of a 1985 conference at the University of Minnesota develop the basic premise that mathematical thought needs to be studied from an interdisciplinary perspective The opening essays study issues arising within logic and the foundations of mathematics a traditional area of interest to historians and philosophers The second section examines issues in the history of mathematics within the framework of established historical periods and questions Next come case studies that illustrate the power of an interdisciplinary approach to the study of mathematics The collection closes with a look at mathematics from a sociohistorical perspective including the way institutions affect what constitutes mathematical knowledge
