Nature Sir Norman Lockyer, 1924 **Dissertations on the History of Metaphysical and Ethical** Dugald

Stewart, 1835 **Descartes and the Metaphysics of Human Nature** Justin Skirry, 2005-11-27 The traditional account of mind body union attributed to Descartes supposes that the immaterial thinking mind and the material non thinking body interact by means of efficient causation that the mind causes events in the body e g the voluntary raising of an arm and vice versa e g the visual sensation of a tree But this gives rise to a notorious philosophical problem how can this causal interaction occur between the spiritual mind and the physical body since they have absolutely nothing in common and cannot come into contact with one another Justin Skirry's book shows how Descartes in fact avoids this enormous problem Skirry argues through a critical re examination of Cartesian metaphysics that the union of mind and body is not as most scholars have always maintained constituted by efficient causal interaction for Descartes because this would not result in one complete human nature but in an aggregate of two numerically distinct natures Descartes argues in the 6th Meditation and elsewhere that mind body union is constituted by what the scholastics called a substantial union i e the union that form mind has with matter body This substantial union produces a whole that is more than the sum of its parts the capacity for modes of sensation and voluntary bodily movement are emergent properties of the whole substantially united mind and body Therefore the Cartesian problem of mind body efficient causal interaction is avoided altogether since efficient causal occurrences between mind and body play no role in explaining the existence of these modes *The Los Angeles Central Library* Kenneth A. Breisch, 2016-12-21 In the most comprehensive investigation of the Los Angeles Public Library's early history and architectural genesis ever undertaken Kenneth Breisch chronicles the institution's first six decades from its founding as a private library association in 1872 through the completion of the iconic Central Library building in 1933 During this time the library evolved from an elite organization ensconced in two rooms in downtown LA into one of the largest public library systems in the United States with architect Bertram Grosvenor Goodhue's building a beloved LA landmark as its centerpiece Goodhue developed a new style fully integrating the building's sculptural and epigraphic program with its architectural forms to express a complex iconography Working closely with sculptor Lee Oskar Lawrie and philosopher Hartley Burr Alexander he created a great civic monument that combined with the library's murals embodies an overarching theme the light of learning A building should read like a book from its title entrance to its alley colophon wrote Alexander a narrative approach to design that serves as a key to understanding Goodhue's architectural gem Breisch draws on a wealth of primary source material to tell the story of one of the most important American buildings of the twentieth century and illuminates the formation of an indispensable modern public institution the American public library **Anglican Theological Review** Samuel Alfred Browne Mercer, Leicester Crosby Lewis, 1925 A New Testament bibliography for 1914 to 1917 inclusive by
