An Encyclopedia of Shamanism Volume 2 Christina Pratt, 2007-08-01 Shamanism can be defined as the practice of initiated shamans who are distinguished by their mastery of a range of altered states of consciousness Shamanism arises from the actions the shaman takes in non ordinary reality and the results of those actions in ordinary reality It is not a religion yet it demands spiritual discipline and personal sacrifice from the mature shaman who seeks the highest stages of mystical development

The Art and Politics of Wana Shamanism Jane Monnig Atkinson, 1992-03-10 This book is a marvelous counterpoint to the rich scholarship that has developed on the center in Southeast Asian societies providing for the first time an in depth study of the play of personhood and power and their historical transformations on the Indonesian periphery Toby Alice Volkman Social Science Research Council A very important work not only for the specialists of island Southeast Asia but also for the general anthropologist Atkinson accomplishes a number of tasks in fresh and innovative ways George E Marcus Rice University Impressively informed by major theoretical issues Atkinson's work at the same time brings her readers into the everyday world of the Wana in Sulawesi Indonesia Renato Rosaldo Stanford University

The Jaguar Within Rebecca R. Stone, 2012-09-21 An important new way of viewing the prehistoric art of the Americas The Jaguar Within demonstrates that understanding a work of art's connection with

shamanic trance can lead to an appreciation of it as an extremely creative solution to the inherent challenge of giving material form to nonmaterial realities and states of being Shamanism the practice of entering a trance state to experience visions of a reality beyond the ordinary and to gain esoteric knowledge has been an important part of life for indigenous societies throughout the Americas from prehistoric times until the present Much has been written about shamanism in both scholarly and popular literature but few authors have linked it to another significant visual realm art In this pioneering study Rebecca R Stone considers how deep familiarity with and profound respect for the extra ordinary visionary experiences of shamanism profoundly affected the artistic output of indigenous cultures in Central and South America before the European invasions of the sixteenth century Using ethnographic accounts of shamanic trance experiences Stone defines a core set of trance vision characteristics including enhanced senses ego dissolution bodily distortions flying spinning and undulating sensations synaesthesia and physical transformation from the human self into animal and other states of being Stone then traces these visionary characteristics in ancient artworks from Costa Rica and Peru She makes a convincing case that these works especially those of the Moche depict shamans in a trance state or else convey the perceptual experience of visions by creating deliberately chaotic and distorted conglomerations of partial inverted and incoherent images **Routledge**
