ABSTRACT

Digital learning technologies have increasingly emerged as critical tools in informing education policy, particularly in fostering equity in education for countries with under-resourced regions. This study explores how national education policies are influenced in integrating technology as a catalyst in bridging the educational divide and improving access to quality learning in an equitable manner. The quantitative survey method was used whereby the study covered 1,200 policymakers and educators from 15 countries in the Global South. Participants were selected based on involvement in the development of education policy or the implementation of digital learning in their communities. Responses were obtained through a structured questionnaire with respect to their perceptions about the implications of technology-driven policies for educational equity. Results indicated that 85% of the participants perceive that, with the advent of digital learning platforms, the access to education in distant and rural areas has increased phenomenally. Further, 78% of the participants believed that digital tools have helped in reducing the gap in educational outcomes between an urban and rural setup. In countries with strong policies related to digital education, a resultant increase of 25% in enrollment was observed in marginalized groups within two years of the adoption of that policy. Seventy percent of the respondents also claimed that digital education has revolutionized learning outcomes, allowing students with disabilities to be included more within mainstream education systems. The study concluded by establishing that technology plays an important role in shaping the equitable national policies of education. It is recommended that policymakers should focus on strengthening the infrastructure of digitals, training teachers, and providing resources to ensure inclusive education for all. Future research should now investigate the impact of digital learning policies on educational equity in the long term, and their potential for scalability across different national contexts.

Chapters cover major themes that have influenced education including the civil rights movement, federal involvement, the accountability movement, family choice, and development of nationalization and globalization. James Bryant Conant, 1964 **Shaping Education** SABUJ. AHMED, 2025-05-22 Education is the cornerstone of any society. It shapes the future of nations, influences economies, and has a profound impact on individuals, communities, and cultures. As a powerful tool for social mobility, personal development, and collective progress, education is essential for building informed, empowered, and innovative citizens. But how we educate, who we educate, and where we educate are determined by the policies we implement and the reforms we pursue. In this rapidly changing world, it is essential to revisit and rethink the policies that govern education systems across the globe. Shaping Education: A Guide to Policy and Reform explores the dynamic intersection of education policy and reform. This book provides an in-depth examination of the forces that shape educational practices and the role that policy plays in creating accessible, equitable, and high-quality education for all. As we move forward, it becomes increasingly clear that effective education policy is not only a matter of responding to present challenges but also of anticipating future needs and creating systems that prepare students for a globalized, technology-driven world. Education systems worldwide are at a crossroads. In the wake of technological advancement, demographic shifts, and evolving global challenges, the need for robust, forward-thinking education policies is more urgent than ever. This book aims to provide both a historical perspective on how education systems have developed through policy, as well as a roadmap for shaping the future of education. It will explore key concepts such as equity, access, quality, and the role of stakeholders in reform efforts: teachers, students, families, policymakers, and communities. Throughout this book, we will examine the complexities of education policy, starting with its historical context and evolving into an exploration of current practices, innovations, and pressing challenges. From government roles and funding allocation to curriculum development and technology integration, this work highlights how each facet of education policy impacts the learning experiences of students. The book also offers practical solutions and recommendations for creating policies that respond to the diverse needs of learners and educators while ensuring a sustainable and equitable educational system. In Shaping Education: A Guide to Policy and Reform, the aim is not only to analyze existing policies but to challenge and inspire new ideas that will pave the way for reform. By focusing on

how policies are designed implemented and evaluated we can understand their profound effects on the learning environment and ultimately on the future of students worldwide As we explore the intricate relationship between education policy and reform this book invites readers educators policymakers administrators researchers and advocates to engage in the conversation about the kind of education system we want to build for future generations The journey ahead is one of innovation collaboration and transformation where effective policy and forward thinking reform have the potential to reshape the educational landscape and in doing so create a brighter more inclusive future for all Shaping Education Reform in China Jian Li,Eryong Xue,2020-09-15 This book examines the ways education reform has been shaped in China Focusing on the past education policy development it offers unique perspectives to illustrate China s education reform and provides an overview of policies and their implications In addition the book discusses educational development educational value educational efforts and educational tasks and explores physical aesthetic and labor education as well as the management of off campus training institutions and the policies on abolishing the Five Only in contemporary China Conceptualizing the education reform model in China since 1949 for the first time the book maps Chinese education policy development

Shaping Education Policy in the States Susan Fuhrman,Alan Rosenthal,1981 Re-Shaping Education for Citizenship Mike Byram,Lai Pak-Sang,2011-11-15 Despite or perhaps because of globalisation and internationalisation in the contemporary world the role of education has become more significant in nation formation However whereas in the past its function was to create homogeneity and assimilation today it must deal with diversity and plurality The modernist premise of one nation one state is being questioned and re constituted with the notion of the plural national state This book explores school processes in Hong Kong under these new conditions The focus is on investigating how the concept of a national identity of the one country two systems policy is developing and is thus a study of that diversity which all education systems now have to address The policy aims at facilitating national re integration and consolidation in the face of an insistence on local citizens universal civic rights and the values of liberty equality democracy and autonomy The analysis shows citizenship education in the Hong Kong school system is more a locally oriented cultural and political process than a transmission of a national ideology Students learn their values attitudes and perspectives by engaging and interacting with people within and beyond the school community They acquire a liberal and democratic national identity which is distinct from that of pan Chinese state nationalism in mainland China The book is thus both a case study of Hong Kong and an analysis of change in the relationship of education citizenship and national identity in the contemporary world **Education, Change, and the Policy Process** Harold Silver,1990 The aim of this book is to track the historical elements of change in educational policy formation and implementation in relation to the specifics of responses to change the possibilities of change and attempts to achieve it Chapter 1 assess whether the future is in past historical change or is simply illuminated by it The notion of an explicit relationship between history and policy analysis is expounded in chapter 2 The answer for successful policy making
