Commerce and Community Robert Garnett Jr., Paul Lewis, Lenore T. Ealy, 2014-11-27 Since the end of the Cold War the human face of economics has gained renewed visibility and generated new conversations among economists and other social theorists The monistic mechanical economic systems that characterized the capitalism vs socialism debates

of the mid twentieth century have given way to pluralistic ecologies of economic provisioning in which complexly constituted agents cooperate via heterogeneous forms of production and exchange Through the lenses of multiple disciplines this book examines how this pluralistic turn in economic thinking bears upon the venerable social theoretical division of cooperative activity into separate spheres of impersonal Gesellschaft commerce and ethically thick Gemeinschaft community Drawing resources from diverse disciplinary and philosophical traditions these essays offer fresh critical appraisals of the Gemeinschaft Gesellschaft segregation of face to face community from impersonal commerce Some authors issue urgent calls to transcend this dualism whilst others propose to recast it in more nuanced ways or affirm the importance of treating impersonal and personal cooperation as ethically epistemically and economically separate worlds Yet even in their disagreements our contributors paint the process of voluntary cooperation the space commerce and community with uncommon color and nuance by traversing the boundaries that once separated the thin sociality of economics as science of commerce from the thick sociality of sociology and anthropology as sciences of community This book facilitates critical exchange among economists philosophers sociologists anthropologists and other social theorists by exploring the overlapping notions of cooperation rationality identity reciprocity trust and exchange that emerge from multiple analytic traditions within and across their respective disciplines
