Shattered Chains:

Grand Finales Susan Gubar, 2025-06-10 One of our most formidable literary critics explores how nine women artists flourished creatively in their final acts In 2008 academic and scholar Susan Gubar was told by a trusted oncologist that she had only a few years left to live Though she outlived that dire prognosis this brush with mortality refocused her attention on the boons of a longevity she did not expect to experience She began to think In the last years of our lives can we shape and change our creative capabilities The resulting volume *Grand Finales* answers this question with a resounding yes Despite the losses generally associated with aging quite a few writers painters sculptors musicians and dancers have managed to extend and repurpose their creative energies Gubar spotlights very creative old ladies writers painters sculptors musicians and dancers from the past and in our times Each of *Grand Finales* nine riveting chapters features women artists George Eliot Colette Georgia O Keeffe Isak Dinesen Marianne Moore Louise Bourgeois Mary Lou Williams Gwendolyn Brooks and Katherine Dunham who transformed the last stage of existence into a rousing conclusion Gubar draws on their late lives and works to suggest that seniority can become a time of reinvention and renewal With pizzazz bravado and geezer machismo she counters the discrediting of elderly women and clarifies the environments relationships activities and attitudes that sponsor a creative old age

Art Rethought Nicholas Wolterstorff, 2015-09-10 Human beings engage works of the arts in many different ways they sing songs while working they kiss icons they create and dedicate memorials Yet almost all philosophers of art of the modern period have ignored this variety and focused entirely on just one mode of engagement namely disinterested attention In the first part of the book Nicholas Wolterstorff asks why philosophers have concentrated on just this one mode of engagement The answer he proposes is that almost all philosophers have accepted what the author calls the grand narrative concerning art in the modern world It is generally agreed that in the early modern period members of the middle class in Western Europe increasingly engaged works of the arts as objects of disinterested attention The grand narrative claims that this change represented the arts coming into their own and that works of art so engaged are socially other and transcendent Wolterstorff argues that the grand narrative has to be rejected as not fitting the facts Wolterstorff then offers an alternative framework for thinking about the arts Central to the alternative framework that he proposes are

the idea of the arts as social practices and the idea of works of the arts as having different meaning in different practices He goes on to use this framework to analyse in some detail five distinct social practices of art and the meaning that works have within those practices the practice of memorial art of art for veneration of social protest art of works songs and of recent art reflexive art

Janney,2013-06-03 As early as 1865 survivors of the Civil War were acutely aware that people were purposefully shaping what would be remembered about the war and what would be

omitted from the historical record In *Remembering the Civil War* Caroline E Janney examines how the war generation men and women black and white Unionists and Confederates crafted and protected their memories of the nation s greatest conflict Janney maintains that the participants never fully embraced the reconciliation so famously represented in handshakes across stone walls Instead both Union and Confederate veterans and most especially their respective women s organizations clung tenaciously to their own causes well into the twentieth century Janney explores the subtle yet important differences between reunion and reconciliation and argues that the Unionist and Emancipationist memories of the war never completely gave way to the story Confederates told She challenges the idea that white northerners and southerners salved their war wounds through shared ideas about race and shows that debates about slavery often proved to be among the most powerful obstacles to reconciliation
