Daily Report, Foreign Radio Broadcasts United States. Central Intelligence Agency, 1965 *Science and Technology in Post-Mao China* Denis Fred Simon, Merle Goldman, 1989 Along with the political and economic reforms that have characterized the post Mao era in China there has been a potentially revolutionary change in Chinese science and technology. Here sixteen scholars examine various facets of the current science and technology scene comparing it with the past and speculating about future trends. Two chapters dealing with science under the Nationalists and under Mao are followed by a section of extensive analysis of reforms under Deng Xiaoping focusing on the organizational system the use of human resources and the emerging response to market forces. Chapters dealing with changes in medical care agriculture and military research and development demonstrate how these reforms have affected specific areas during the Chinese shift away from Party orthodoxy and Maoist populism toward professional expertise as the guiding principle in science and technology. Three further chapters deal with China's interface with the world at large in the process of technology transfer. Both the introductory and concluding chapters describe the tension between the Chinese Communist Party structure with its

inclinations toward strict vertical control and the scientific and technological community's need for a free flow of information across organizational disciplinary and national boundaries *Translations on Communist China*, 1969-10 **Weekly Information Report on Communist China** United States. Central Intelligence Agency, 1957 *China's Industrial Technology* Shulin Gu, 2004-01-14 Offering a comprehensive review of reform policy followed by an examination of major approaches to institutional restructuring Shulin Gu explores the way in which China's industrial technology has responded to economic reforms At the heart of the work is the argument that market reform and organisational change are closely interdependent Gu outlines the interaction of the two in China and reveals the damage which may result if market reform is not accompanied by new organisational design Analysis of these issues is drawn from first hand experience of Chinese technology systems supported by insights from technological innovation economics and transaction cost economics

China's Four Modernizations Richard Baum, 2019-03-13 With the death of Mao Tse tung and the subsequent purge of the Gang of Four China's new pragmatic leaders have embarked on a crash program of national development known as the Four Modernizations This program is geared to the primary objective of turning China into a major world economic and military power by the year 2000 In this book the outgrowth of a major international conference on China's post Maoist development ten distinguished analysts examine one of the core issues in China's current modernization drive the acquisition and use of modern industrial science and technology The authors address the politics of China's technological modernization the institutional structure of technological research the purchase of foreign technology constraints on technological absorption the growth potential of China's critical energy sector and the modernization of China's military establishment Supplemented with brief commentaries by leading academic government and private sector contributors their chapters provide an in depth look at the process problems and prospects of China's widely heralded technological revolution **Translations on**

Communist China's Food and Agriculture United States. Joint Publications Research Service, 1964 China in the World Market Thomas Geoffrey Moore, 2002-03-18 This book will be provocative reading for anyone concerned with China and the world economy *China's Allocation of Fixed Capital Investment, 1952-1957* Chu-yuan Cheng, 2020-08-06 China's efforts to stimulate industrial development and economic growth through the allocation of investments are analyzed Cheng concludes with an overall assessment of the distinctive features of the allocation pattern Includes 41 statistical tables **China's Agricultural Modernization** On Kit Tam, 2023-08-01 Originally published in 1985 this study investigates the actual experience in mechanization during the Fourth Five Year Plan period a period which represented in many ways a new stage in China's rural development It examines the historical perspective and the development approach under which mechanization efforts were exerted during this 5 year period and the mechanism outcomes and problems these entailed The book addresses the issues involved in agricultural development and mechanization through a more integral analysis of the way technological transformation has been linked to China's quest for social and economic development
