Magic Feather The Truth About Special Education:

The Magic Feather Lori Granger, Bill Granger, 1989-08-01 Based upon studies of the ways in which children are labeled and treated in schools including the experience of their own son the authors determine that the processes that the educational system employs to determine learning disabilities are inaccurate [Rethinking Professional Issues in Special Education](#) James L. Paul, Carolyn D. Lavelly, Ann Cranston-Gingras, Ella L. Taylor, 2002-07-30 Special educators are facing new challenges at the beginning of the 21st century as public education is being reformed by a vision focusing on measurable student outcomes The future course of the field will be shaped by the policy and programmatic responses to several issues including demographic changes in student populations a lack of certified special education teachers criticism in the public media for the rising costs of services and debates about the preferred philosophy of service delivery for students with disabilities Additional chapters discuss university school collaboration charter schools disability studies school violence disproportionality in placement male African American teachers and ethics This book has been written out of a context of research and program development activities with public schools over the past decade in one of the largest Colleges of Education in a diverse metropolitan area in the country The issues selected for analysis and the perspective guiding those analyses grew out of this work and out of a national Delphi study of the views of parents and constituent organizations and leading researchers teacher educators and policy makers in Special Education **The Magic Feather** Lori Granger, Bill Granger, 1986 Describes the personal experiences of the Grangers with the special education system and explains how to fight the mislabeling of your child as mildly handicapped *Disability as a Social Construct* Claire H. Liachowitz, 2010-11-24 Wounded soldiers injured workers handicapped adults and physically impaired children have all been affected by legislation that reduces their opportunities to live a functional life In *Disability as a Social Construct* Claire Liachowitz contends that disability is not merely a result of a handicap but can be imposed by society through devaluation and segregation of people who deviate from physical norms She analyzes pertinent American legislation primarily from 1770 to 1920 to provide a new perspective on the mechanisms that translate physical defects into social and civil inferiority **Public Policy for Democracy** Helen Ingram, Steven Rathgeb Smith, 2011-04-01 A fundamental rethinking is under way about the roles of government citizens and community organizations in public policy Can government be reconstructed to make public policies more responsive to citizens and thus more effective This challenge is apparent in the activist policy agenda of the Clinton administration which supports national service programs government voluntary collaborations and community based development projects *Public Policy for Democracy* is an important and timely contribution to the current discussion of how to get people more involved in their own governance In this book contributors urge policymakers and policy analysts to promote a more vigorous and inclusive democracy by incorporating concerns about citizenship in their craft rather than strictly emphasizing efficiency and effectiveness The authors provide insight into how the social construction of politics affects the

recipients of the policies and the public in general They call attention to how policies reinforce negative stereotypes of some groups such as welfare recipients and often lead to political alienation and withdrawal In addition they discuss how policies using clinical reason a term borrowed from medicine and used as a way to classify people are increasingly applied to nonmedical situations such as domestic violence to restrict individual power and legitimacy The authors argue that much needs to be done by the government itself to improve policy design and empower all citizens to participate in the democratic process They identify concrete strategies for policymakers to enhance the role of citizens without sacrificing program effectiveness

Hidden in the Shadow of Truth Reginald E. Hicks, 2010-05 Hidden in the Shadow of Truth was written by Reginald E Hicks neither to absolve nor to indict black males for their current social condition It was written rather to provide a comprehensive and accurate explanation as to why so many black males seem to be led by the nose toward the prison doors Why is it that black juveniles consistently outpace their white Hispanic and Asian counterparts by a margin of more than 2 to 1 in the commission of murders aggravated assaults weapons law violations forcible rapes robberies and motor vehicle thefts Why is it that blacks account for only 13 percent of the total U S population but a full 41 percent of the incarcerated Hicks explains that the mentality of many black youth is a product of a very unique socialization process wherein the family the school system the peer group and the mass media have collectively failed in their responsibilities making black boys more prone to choosing the path of incarceration or enslavement through criminality In this exceptional work Reginald E Hicks presents the truth the whole truth and nothing but the truth letting the chips fall where they may

Everybody Belongs Arthur Shapiro, 2003-09 The evil prosthesis of Captain Hook the comical speech of Porky Pig and the bumbling antics of Mr Magoo are all examples of images in our culture which can become the basis of negative attitudes and subliminal prejudice towards persons with disabilities These attitudes influence and underlie discriminatory acts resulting in negative treatment and segregation A teacher s ability to recognize and counter such images may well determine the success of inclusion and mainstreaming programs in our schools and society Well researched and well written this book offers practical guidance as grounded in solid research to schools that are wrestling with how to mainstream children with disabilities

Hlebowitsh, Founding Editor Tanner, Daniel Tanner, 2012-08-06 The Research Review for School Leaders Volume III is specifically designed as a practical resource for school leaders whose schedules preclude opportunities to locate and review key research on every issue they must address It places comprehensive current and accessible reviews of educational research at their fingertips and is organized to make the research and practices it summarizes useful to them in their professional endeavors This is the third volume of the Review Although the title has changed its purpose and substance is continuous with the work of the earlier volumes The first Annual Review of Research for School Leaders 1996 summarized research on the status of public schooling interdisciplinary curriculum and educational applications of computers The second volume 1998 addressed the topics of middle level

The Righting of Passage A. David Napier, 2004-04-19 Today much theory in the social sciences assumes that the acceptance of experience as inevitably unruly means that it is characterized by constant change and even by chaos In such a world we are told the unordered qualities of daily living create so much uncertainty that identity itself becomes unstable But this view David Napier argues begs a fundamental question if contemporary life is as flexible and unstructured as for example postmodernists maintain and we in turn are products of such a world how might any of us order our thinking enough to recognize what is meaningful in life let alone describe our experiences in ways that might have meaning for others If we are truly the products of modernity Napier says we must either accept our inability to structure and shape our own sensations or alternately argue for some form of humanism that sees a struggling existential self living unsettled within its unstructured environment Were either circumstance universally the case the world would of course be a rather different place for there would be no shared literature called postmodern and there would be no one to dissect such experience for us no authors with coherent identities no theories that could be communicated no books bought or read no university departments dedicated to the industry of chaos In short there would be no ordered space for interpersonal understanding in such a world This is the premise that informs The Righting of Passage In this challenging book Napier offers a novel argument that accounts for diffuse and flexible notions of the self while also illustrating how a coherent communicating self persists amid such apparent instability This he does by arguing something entirely counterintuitive to both modernist and postmodernist positions namely that modernity's increasing separation of embodiment from meaning not only slows down human transformation but attenuates human growth by encouraging us to perceive risk as largely pathological Today the combined forces of stress management depth psychology therapeutic writing dislocated meaning and of institutional conformity work together to produce a reduction not a proliferation of change in human life
