Magical Thinking Poems:

Magical Thinking Joseph Duemer, 2001 Psychologists characterize thinking as a form of thought in which wishes and desires shape the reality we perceive Such thinking is usually dismissed as delusional But most human beings think magically most of the time and have done so throughout history It is the kind of thinking that has produced cathedrals and symphonies depravity and genocide Joseph Duemer's poems attempt to shape his magical thinking into understandable forms His poetry is an argument with science and religion which seek to establish themselves as systems that organize experience into stable meanings

Your Therapist Says It's Magical Thinking Sadie McCarney, 2023-04-18 Sadie McCarney's *Your Therapist Says It's Magical Thinking* is a buoyant second collection that playfully navigates the turbulent waters of life with mental illness and neurodivergence In much of the book history and science are treated the way they are often viewed by a brain in mental turmoil places and events get switched around facts get rewritten and the fantastical reigns supreme Through poems ranging from didactic the horrible self care advice received by the poet when she was struggling most to historical fiction patients in an asylum in 1800s England to the quirky and unexpectedly fantastical a rainbow carpool unicorn a young child's timeline reversing each morning and an everything bagel that includes competing theories of time McCarney digs deep into the muck of her own lived experience She resurfaces with if not gold at least an old time capsule and a few treasured hunks of bone

Your Therapist Says It's Magical Thinking highlights the sometimes dubious but always jubilant inner workings of a mentally unwell brain at play especially within the context of a larger society that frequently seeks to tamp down this weird and rare form of magic

Critical Neurophilosophy & Indigenous Wisdom Four Arrows, Gerg Cajete, Jongmin Lee, 2010-01-01 This book begins a long overdue dialogue between Western neuropsychology and Indigenous wisdom The latter holds that technology including that which supports the neurosciences is an important aspect of humanity but that without a deeper understanding of the sacred natural world its consequences will continue to disrupt the balance of life on Earth This book argues that without incorporating Indigenous wisdom into theories relating to brain research and scientific assumptions about human nature humanity may never learn how to avoid this problem After summarizing current studies about such important topics as generosity truthfulness courage humour art spirituality and lateralization two indigenous scholars and a South Korean neuroscientist discuss the research conclusions In most cases the ancient knowledge of Indigenous Peoples reveals significantly contrasting perspectives By offering students of neuropsychology and the various schools of neurophilosophy radically different views than those seen through the lens of Western science this book will help assure that understandings about the human brain may lead to a more healthy balance in

human affairs Questions at the end of each chapter give opportunities for the reader to continue the dialogue and find further studies to support or refute the Indigenous assertions Augustan Poetry and the Irrational Philip R. Hardie, 2016

The establishment of the Augustan regime presents itself as the assertion of order and rationality in the political ideological and artistic spheres after the disorder and madness of the civil wars of the late Republic But the classical Apollonian poetry of the Augustan period is fascinated by the irrational in both the public and private spheres There is a vivid memory of the political and military furor that destroyed the Republic and also an anxiety that furor may resurface that the repressed may return Epic and elegy are both obsessed with erotic madness Dido experiences in her very public role the disabling effects of love that are both lamented and celebrated by the love elegists Didactic especially the Georgics and the related Horatian exercises in satire and epistle offer programmes for constructing rational order in the natural political and psychological worlds but at best contain uneasily an ever present threat of confusion and backsliding and for the most part fall short of the austere standards of rational exposition set by Lucretius Dionysus and the Dionysiac enjoy a prominence in Augustan poetry and art that goes well beyond the merely ornamental The person of the emperor Augustus himself tests the limits of rational categorization Augustan Poetry and the Irrational contains contributions by some of the leading experts of the Augustan period as well as a number of younger scholars An introduction which surveys the field as a whole is followed by chapters that examine the manifestations of the irrational in a range of Augustan poets including Virgil Horace Ovid and the love elegists and also explore elements of post classical reception **A Translation and Interpretation of Horace's Iambi**

Andy Law, 2024-03-25 Horace's book of seventeen iambi by convention called Epodes contains some of the most complex and controversial poetry of his entire career This new interpretation exposes a poet in the throes of the torment of writing Horace crafts an artwork which reveals the agony of expressing agony He struggles to find the words as he gives voice to the anticipation of grief The poet's inner demons conspire against him Anything that could go wrong does go wrong At the end we realise that Horace might have never wanted to write this book in the first place But the fate of this writer is to be forever persecuted by his own writing Horace's iambi are methodically stitched together Meter intertextuality wordplay and theme combine strategically to provide an utterly compelling and vivid watercolor in words It is a work of art which is able to hold its place amongst any top tier poetry in any language in any era *Lost Loss in American Elegiac Poetry* Toshiaki Komura, 2020-10-07 *Lost Loss in American Elegiac Poetry* Tracing Inaccessible Grief from Stevens to Post 9/11 examines contemporary literary expressions of losses that are lost on us inquiring what it means to lose loss and what happens when dispossession experiences go unacknowledged or become inaccessible Toshiaki Komura analyzes a range of elegiac poetry that does not neatly align with conventional assumptions about the genre including Wallace Stevens's *The Owl in the Sarcophagus* Sylvia Plath's last poems Elizabeth Bishop's *Geography III* Sharon Olds's *The Dead and the Living* Louise Glück's *Averno* and poems written after 9/11 What these poems reveal at the intersection of personal and communal mourning are

the mechanism of cognitive myth making involved in denied grief and its social and ethical implications Engaging with an assortment of philosophical psychoanalytic and psychological theories *Lost Loss in American Elegiac Poetry* elucidates how poetry gives shape to the vague despondency of unrecognized loss and what kind of phantomic effects these equivocal grieving experiences may create Strange Good Fortune: Essays on Contemporary Poetry (p) ,2001
