Magnetospheric Physics C.G. Fälthammar,B. Hultqvist,2013-11-11 This book contains the proceedings of the 1989 Crafoord Symposium organized by the Royal Swedish Academy of Sciences The scientific field for the Crafoord Prize of 1989 was decided in 1988 by the Academy to be Magnetospheric Physics On September 27 1989 the Academy awarded the 1989 Crafoord Prize to Professor J A Van Allen Iowa City USA for his pioneer work in space research in particular for the discovery of the high energy charged particles that are trapped in the Earth s magnetic field and form the radiation belts often called the Van Allen belts around the Earth The subject for the Crafoord Symposium which was held on September 28 29 at the Royal Swedish Academy of

Sciences in Stockholm was Magnetospheric Physics Achievements and Prospects Some seventy of the world's leading scientists in magnetospheric physics see list of participants were invited to the Symposium The program contained only invited papers After the presentation of the Crafoord Prize Laureate Prof J A Van Allen and his specially invited lecture Active Experiments in Magnetospheric Physics follows in these proceedings two papers on the achievements of magnetospheric research hitherto The main part of the proceedings 8 papers deal with the main theme of the Symposium How we shall carry on magnetospheric research in the future The Symposium was organized by five members of the Academy representing the field of space physics Lars Block Stockholm Rolf Bostrom Uppsala Kerstin Fredga Stockholm Carl Gunne Fiilthammar Stockholm and Bengt Hultqvist Kiruna Chairman **Ground-based Research Program** National Academy of Sciences (U.S.). Origins Of Magnetospheric Physics James A. Van Allen, 2004-10 Early in 1958 instruments on the space satellites Explorer I and Explorer III revealed the presence of radiation belts enormous populations of energetic particles trapped in the magnetic field of the earth Originally published in 1983 but long out of print until now Origins of Magnetospheric Physics tells the story of this dramatic and hugely transformative period in scientific and Cold War history Writing in an accessible style and drawing on personal journals correspondence published papers and the recollections of colleagues James Van Allen documents a trail blazing era in space history *Magnetospheric Research and the History of the Solar System* Hannes Alfvén, 1984 Planetary magnetospheric physics. 1. Proceedings of symposium 6 and the topical meeting of the COSPAR Interdisciplinary Scientific Commission D (meetings D2, D4) of the COSPAR twenty-eighth plenary meeting held in The Hague, The Netherlands, 25 June - 6 July 1990 R. J. L. Grard, 1989 **Magnetospheric Dynamics and the International Living with a Star Program**, 2006 **Magnetospheric Plasma Physics: The Impact of Jim Dungey's Research** David Southwood, Stanley W. H. Cowley FRS, Simon Mitton, 2016-10-22 This book makes good background reading for much of modern magnetospheric physics Its origin was a Festspiel for Professor Jim Dungey former professor in the Physics Department at Imperial College on the occasion of his 90th birthday 30 January 2013 Remarkably although he retired 30 years ago his pioneering and often maverick work in the 50 s through to the 70 s on solar terrestrial physics is probably more widely appreciated today than when he retired Dungey was a theoretical plasma physicist The book covers how his reconnection model of the magnetosphere evolved to become the standard model of solar terrestrial coupling Dungey's open magnetosphere model now underpins a holistic picture explaining not only the magnetic and plasma structure of the magnetosphere but also its dynamics which can be monitored in real time The book also shows how modern day simulation of solar terrestrial coupling can reproduce the real time evolution of the solar terrestrial system in ways undreamt of in 1961

when Dungey's epoch making paper was published Further contributions on current Earth magnetosphere research and space plasma physics included in this book show how Dungey's basic ideas have remained explanative 50 years on But the Festspiel also introduced some advances that possibly Dungey had not foreseen One of the contributions presented in this book is on the variety of magnetospheres of the solar system which have been seen directly during the space age discussing the variations in spatial scale and reconnection time scale and comparing them in respect of Earth Mercury the giant planets as well as Ganymede
