Magnificent Minutiae:

The Burning Island Pamela Frierson, 2012-05-29 Westerners from early missionaries to explorers to present day artists scientists and tourists have always found volcanoes fascinating and disturbing Native Hawaiians in contrast revere volcanoes as a source of spiritual energy and see the volcano goddess Pele as part of the natural cycle of a continuously procreative cosmos Volcanoes hold a special place in our curiosity about nature The Burning Island is an intimate multilayered portrait of the Hawaiian volcano region a land marked by a precarious tension between the harsh reality of constant geologic change respect for mythological traditions and the pressures of economic exploitation Pamela Frierson treks up Mauna Loa the world's largest active volcano and Kilauea to explore how volcanoes work as well as how their powerful and destructive forces reshape land cultures and history Her adventures reveal surprising archeological ruins threatened rainforest ecosystems and questionable real estate development of the islands Now a classic of nature writing Frierson's narrative sets the stage for a larger exploration of our need to take great care in respecting and preserving nature and tradition while balancing our ever expanding sense of discovery and use of the land *Hilo Lava Flood Control*, 1981 **Hawaiian**

Bare Architecture Chris L. Smith, 2017-10-19 *Bare Architecture* a schizoanalysis is a poststructural exploration of the interface between architecture and the body Chris L. Smith skilfully introduces and explains numerous concepts drawn from poststructural philosophy to explore the manner by which the architecture-body relation may be rethought in the 21st century Multiple well-known figures in the discourses of poststructuralism are invoked Gilles Deleuze and Félix Guattari Roland Barthes Georges Bataille Maurice Blanchot Jorge Luis Borges and Michel Serres These figures bring into view the philosophical frame in which the body is formulated Alongside the philosophy the architecture that Smith comes to refer to as bare architecture is explored Smith considers architecture as a complex construction and the book draws upon literature art and music to provide a critique of the limits extents and opportunities for architecture itself

The book considers key works from the architects Douglas Darden Georges Pingusson Lacatan and Vassal Carlo Scarpa Peter Zumthor Marco Casagrande and Sami Rintala and Raumlabor Such works are engaged for their capacities to foster a rethinking of the relation between architecture and the body **Lava Flow Control, Island of Hawaii** United States. wistful and sharp particularly on what it really means to live Daily Mail 56 Kostya Kennedy,2011-03-10 **Library World** ,1911 Florence in Transition Marvin Becker,2019-08-01 Originally published in 1968 In the pluralistic society of the medieval commune informal and personal ties of obligation bound men together In trecento Florence this gentle communal structure gradually evolved into the stricter more centralized organization characteristic of the modern state A growing emphasis on law and order transformed the medieval commune of the early fourteenth century into the Renaissance territorial state of the latter half of the century Professor Becker s subject is this metamorphosis Following his study of the declining communal paideia in Volume One the author examines in this second volume the growing vigor of public world as well as the attendant depersonalization and repression He is concerned primarily with two factors that he considers the major forces producing the Renaissance territorial state and encouraging the growth of imperial government and constitutionalism the intrusion of new citizens novi cives into politics after 1343 and the skyrocketing of communal debt Thus the author disputes Burckhardt s idea of the state as a work of art viewing it instead as a creation of socioeconomic mobility and deficit financing Further in examining art and literature as symptoms of developing public culture and reactions to it Professor Becker interprets them as indications of increased public involvement of the Florentine citizens thus providing a sharp refutation of Burkhardt s egoistic violent Renaissance man The author concludes his study with a detailed description of the territorial state itself pointing out the new relationship between citizen and polis which emerged in the early fifteenth century These two volumes provide a compelling and challenging interpretation of a crucial period in Western history
