Maintaining Effective Token Economies:

Maintaining Effective Token Economies Roger L. Patterson, 1976 The Token Economy Alan Kazdin, 2012-12-06

Applications of operant techniques in treatment and education have proliferated in recent years. Among the various techniques, the token economy has been particularly popular. The token economy has been extended to many populations included in psychiatry, clinical psychology, education, and the mental health fields in general. Of course, merely because a technique is applied widely does not necessarily argue for its efficacy. Yet the token economy has been extensively researched. The main purpose of this book is to review, elaborate, and evaluate critically research bearing on the token economy. The book examines several features of the token economy, including the variables that contribute to its efficacy, the accomplishments, limitations, and potential weaknesses, and recent advances. Because the token economy literature is vast, the book encompasses programs in diverse treatment, rehabilitation, and educational settings across a wide range of populations and behaviors. Within the last few years, a small number of books on token economies have appeared. Each of these books describes a particular token economy in one treatment setting, details practical problems encountered, and provides suggestions for administering the program. This focus is important but neglects the extensive scholarly research on token economies. The present book reviews research across diverse settings and clients. Actually, this focus is quite relevant for implementing token economies because the research reveals those aspects and treatment variations that contribute to or enhance client performance.

Handbook of Behavior Modification with the Mentally Retarded J. L. Matson, 2013-03-14

Mental retardation has probably existed for as long as mankind has inhabited the earth. References to seemingly retarded persons appear in Greek and Roman literature. Examination of Egyptian mummies suggests that some may have suffered from diseases associated with mental retardation. Mohammed advocated feeding and housing those without reason. There is other evidence for favorable attitudes toward the retarded in early history, but attitudes varied from age to age and from country to country. The concept of remediation did not emerge until the nineteenth century. Earlier, in 1798, Itard published an account of his attempt to train the wild boy of Aveyron. A rash of efforts to habilitate retarded persons followed. Training schools were developed in Europe and the United States in the 1800s; however, these early schools did not fulfill their promise, and by the end of the nineteenth century, large, inhumane warehouses for retarded persons existed. The notion of habilitation through training had largely been abandoned and was not to reappear until after World War II.

Hadley, 2013-06-29 Undeniably language is at the core of human existence Merleau Ponty 1945 posited that thought and language are one cognition being language language cognition Although such a categorical stance can be challenged from a number of theoretical perspectives as dogmatic and nonveridical the critical role of language in humanness is irrefutable It is what defines and distinguishes creatures at the apex of the phylogenetic scale The fact that cognition predates verbal fluency and can take various nonverbal forms does not diminish the pivotal role of language it is a functional requisite an imperative More than a mere vehicle to express thought it transforms modifies and shapes much of cognition It cannot be trivialized On many grounds man is capably rivalled by lower forms of existence the gazelle is more graceful the lion is stronger the cheetah is fleetier It is through his use of symbols that man usurps the ascendant position Cassirer in *Essay on Man* 1946 described man as animal symbolicum the animal that creates symbols and a symbolic world Through language humans transcend time and are able to describe events temporally removed to reflect on the past to conjecture the future With words man can paint pictures muse and dream embrace and console persuade and corrupt educate and be educated Language is a preferred performatory domain nowhere more than in Western Civilization Overcoming Deficits of Aging Roger L. Patterson, Larry W. Dupree, David A. Eberly, Gary M. Jackson, Michael J. O'Sullivan, Louis A. Penner, Carla Dee Kelly, 2013-03-13 That older patients can be successfully treated has only recently been recognized by professionals and by older persons themselves That older persons can also be taught new skills or retaught previously existing skills constitutes

even newer knowledge By focusing on the reversibility of behavioral deficits in the elderly the authors under the leadership of Dr Roger Patterson have made both a scientific and a humanitarian contribution to the well being of older persons In this volume they have presented a theoretical basis and a practical how to method of overcoming behavioral deficits They have demonstrated that their modular technique of fostering improved functioning in such areas as activities of daily living and social skills not only has been successful but also has allowed individuals to return to less restrictive environments or to completely independent living The approach is an interdisciplinary one appropriately since older people often experience difficulties in multiple areas of functioning The authors have tried to integrate social medical and behavioral approaches with an emphasis on behavioral methodologies Although this book deals primarily with behavioral approaches to treatment of the elderly in a single setting the volume clearly constitutes a challenge to other scientists and clinicians to apply the techniques described here in other settings A medical colleague of mine a geriatrician recently expressed the opinion that he had never encountered an older patient for whom he could not do something to improve health

Applications of Conditioning Theory Graham Davey, 2017-11-01

The area of applied psychology known as behaviour modification or behaviour therapy had progressed remarkably in the ten years prior to publication. Illustrative of this progress is the variety of therapeutic and behaviour management techniques now available to the applied psychologist. This volume originally published in 1981 describes some of the important characteristics of this development and in particular the relationship between behaviour change techniques and the principles of conditioning theory that generated them. This brief gives rise to three main themes. First the book describes some of the reasons underlying the adoption of the conditioning paradigm and the epistemological advantages of the paradigm for behaviour modification. Second a number of chapters discuss the current trends in specific areas of applied psychology where conditioning principles play an important heuristic role. These chapters deal with the uses made of conditioning theory in the areas of mental handicap, psychiatric therapy, work organizations and the treatment of brain injury. Third later chapters discuss some of the more recent theoretical developments in the field of behaviour modification therapy in particular the drift from strict behaviouristic applications of conditioning principles to more cognitive ones.

Behavior Change in the Human Services Martin Sundel, Sandra S. Sundel, 2017-01-13 Using a unique behavioral assessment and treatment planning framework the updated Sixth Edition provides a systematic overview of behavioral and cognitive principles and their applications to a wide range of issues and situations encountered in human services professions. Up to date practice examples drawn from eight diverse case studies illustrate the range and versatility of the behavior change approach in an increasingly diverse and multicultural society while an innovative chapter on clinical applications of behavioral and cognitive intervention techniques also addresses current influences in the field. This edition embraces the rigorous empirical foundations that have made this approach such a significant contributor to the national and international therapeutic milieu of the 21st century.

Building Integrated Collaborative Relationships for Inclusive Learning Settings AuCoin, Dena, 2021-06-25 As a result of the mandates of the Individual with Disabilities Education Improvement Act (IDEIA) inclusive practices have become the norm for addressing the needs of all learners. In addition these mandates require that steps must be taken to guarantee that all students are successful in all school settings regardless of ability. Possibly now more than ever educators should be experts in building collaborative relationships for inclusive settings. The perceived positive benefits of collaboration among teachers for inclusive settings creates a topic of interest. Research has begun to focus on the study of the deep or integrated collaborative relationships between special education and general education teachers and the use of inclusive learning communities to support practice. Building Integrated Collaborative Relationships for Inclusive Learning Settings provides background information on special education law, inclusion and strategies for integrated collaborative relationships that include the creation of inclusion professional learning communities and a map for intended collaboration. Moreover the book provides insights and supports professionals concerned with the evolving environment of schools and education and how to best meet the needs of all learners. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of captivating stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and suspenseful novel that will keep you guessing until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
