And so it is with the beamed electromagnetic technology in reported use by thousands of victims today nationwide and near millions globally being used as a covert method of physical torture by specific agencies, military personnel in the civilian arena, Federal FBI Joint Resource Intelligence Center (JRIC) in California, and Fusion Center leadership as the approving authority for unified military technology and military personnel, state and local police departments, the new paradigm. A corrupt division of the Los Angeles Police Department, satellite counterterrorism division, four floors underground, known as the Real Time Analysis and Critical Response (RACR) Division, is an example of the hidden and monstrous, unchecked use of these weapons when used for hideous silencing, suppression of exposure of official illegal wrong, and subjugation. Scalar Silent Sound Directed Energy Weapons (DEW), Sonic and acoustic, and the Active Denial System, also drone equipped, are in widespread use. As early as the 1930s, Nikola Tesla and others called these types of weapons having the health deteriorating effect using electromagnetic energy, the Death Ray. The characteristic of these technologies, covert use when used in relentless attacks on targeted victims, is its intentional, deceptive, frightening design designed to give the appearance of naturally occurring death or major illnesses by extremely low frequencies, although it is technological electromagnetic slow kill. Leukemia, tumorous cancers, heart inflections, and a host of other intentional medical conditions are manifested in targets, resulting in slow debilitating illnesses and diseases. Those being used in remote technological experimentation for many and varied reasons are witnessing the slow manifestation of illnesses which range also from unusual joint deterioration to depression, migraines, weakness, and fatigue, to also extreme and medically unexplained severe neurological problems and autoimmune disease. Whistleblowers are described as Primary Targets such as Renee Pittman. Primary Targets are those who have been placed on the hit list, marked for the slow kill, and are being heavily targeted 24/7 in intentional physical and psychological torture programs using remotely directed microwave energy weapons which are also termed psychotronic in a decisive manner to covertly, technologically reduce a

lifespan The overall structure of this program is to destroy every aspect of the target's life mentally and physically by using technology to create systematic tissue and organ damage mental illness resulting from the deployment of the focused directional beam relentlessly over a period of time Victims who end up at this level in this program are often those who begin to realize what is happening and by their exposure become a threat The Program does not just stop with primaries In the full spectrum of this ruthless testing program Ordinary Victimized Individuals are people who have been unsuspectingly put on a list to be either experimented on destroyed or mind controlled with remote frequencies Women said to be 70% of those targeted fit this category This is especially true when single and living alone and reportedly are also being sexually exploited by patented stimulation beams It is all done quietly covertly secretly and it's strategic and slyly orchestrated Without public awareness through mainstream media on Gag Orders exposing these crimes victims have no real help when it is military and unified law enforcement The torture then results in microwave COINTELPRO Covert Technological Murder by the Pain Ray Beam The weapons are portable handheld also and defined in the Space Preservation Act of 2001 Sec 7 and make the perfect official crime

Left in the Past Alastair Bonnett, 2010-05-06 This book looks at the role nostalgia plays in the radical imagination to offer a new guide to the history and politics of the left In Left in the Past Bonnett reassesses the place of nostalgia within radical politics and in doing so provides a new introduction to the history and politics of the left Bonnett argues that nostalgia has been a chronic but repressed aspect of the socialist imagination Left in the Past is premised on the idea that in our post socialist era the relationship between radicalism and a sense of loss and the ambivalent position of socialism in and against modernity can be viewed with greater clarity In Section One of the book Bonnett shows the centrality and repression of nostalgia in both 19th century radicalism and anti colonial radicalism In Section Two he explores the consequences of this inheritance by way of 20th century and contemporary studies of revolutionary intellectuals and intellectual culture Bonnett's unique approach in how to understand the left in an age of post socialism will make book a needed resource for anyone interested in the history and politics of the left and radicalism

**Remote Brain Targeting - Evolution of Mind Control in U.S.A.: A Compilation of Historical Information Derived from Various Sources (Mind Control Technology Book Series) Book I of 7** Renee Pittman, 2011-10-13 The objective today is to isolate targets through technological harassment remote viewing electronic surveillance and also focus on using everyone around them subliminally influenced The target is depicted to the community as incompetent disloyal troublesome mentally unbalanced or ill to mobilized community stalking efforts This permits an expertly crafted promotion and denial that highly advanced mind invasive technology exists The whistleblower targeted individual targeted for various reasons is then heinously maliciously secretly abused by electromagnetic systems difficult to prove because it is unseen to the human eye or detectable as extremely low frequency ELF radio and microwaves waves The objective is to push the target over the edge to suicide hurting self or others entrapped jail or be institutionalized Others watch and become frightened preventing them from

speaking out against these extreme immoral and unethical injustices in the form of covert terrorism with many players and denial of Human Rights Remote Neural Monitoring testing has also thrived within the Association of Psychiatry historically The electromagnetic assaults physical psychological and verbal continue until the target is left discredited exhausted and in poor health financially crippled or his or her life is in ruins or worse And it is legal Remote Brain Targeting confirms Pittman s credibility in this five book series which details her personal experiences and others detailing how the slow kill effect is being used today as a form of physical coercion electromagnetically All five books in the Mind Control Technology book series are a must read and a wake up call to an older generation familiar with and knowledgeable of some of these programs specifically MK ULTRA mind control testing officially in the 50s 60s and 70 s and Pittman s renewed hope to stir the consciousness of a new generation through awareness of what is factually happening today to many Today the technology has erupted into an electromagnetic invasion that is unparalleled in this day and time and heinously capable of delivery through many methods and from a considerable distance This technology is no joke A MUST READ Knowledge is Power Awareness is Key TRUTH a powerful weapon Living Life Awake Kristin Walker,2021-07-19 Are you programming yourself or is your life programming you In Living Life Awake author Kristin Walker offers a process of programming your brain to be smart to do more than help your body survive and exist in a happy state The concrete brain researched information in this guide ensures you stay on track with your life plans Walker liberates you from crippling negative thoughts shows you how to overcome challenges and equips you to live life fully Through seventy five daily messages Living Life Awake helps you develop a smart brain You will learn skills and develop habits to get even better grades excel in leadership roles and attract healthy relationships Walker teaches you how the brain works and how to use that knowledge to your advantage to upgrade your focus putting and keeping your life on track with your true potential When I reflected upon the difficulties faced by today s rising generation I knew I had to do something I combined my knowledge of the brain with my mom heart and gave birth to this book Kristin Walker *Walking's New Movement* Phil Smith,2015-03-18 A book about developments in walking and walk performance for enthusiasts practitioners students and academics **London from Punk to Blair** Joe Kerr,Andrew Gibson,2003 Based upon an exploration of essays maps journeys pictures narratives and signs the editors have compiled an overview of London from the mid 70s through to the days of the Blair administration Reflections on the Problem of Consciousness Errol E. Harris,2006-05-07 The relation between body and mind has presented philosophy with its perennial problem It exercised the minds of Plato and Aristotle and it was implicit in the thought if not always present to the minds of the Presocratics In modern philosophy it became explicit in Descartes s Meditations and remained central to the deliberations of every subsequent philosopher of any significance from Hobbes to Hume from Spinoza to Hegel and from Husserl and Heidegger to Russell and Whitehead From whatever angle one approaches philosophy one cannot avoid this problem Moral philosophy both ethical and political compels one to adopt some conception of human nature its origins and

status within the world for one cannot decide on the best way to live without considering the impact of natural influences on the human condition and of human behaviour on nature including other humans and these considerations at once raise the question of the relation of the human mind to Nature and the natural body it enlightens A philosophy of Nature must include the place of humanity in the natural scheme not only the human body but also the knowing mind Metaphysics cannot be divorced from Epistemology nor can that neglect the part played in the acquisition of knowledge by the bodily senses And clearly a philosophy of mind must include some vision of the relation of the mind to the body it inhabits Iain Sinclair Brian Baker, 2013-01-18 A clearly written comprehensive critical introduction to one of the most original contemporary British writers providing an overview of all of Sinclair's major works and an analysis of his vision of modern London This book places Sinclair in a range of contexts including the late 1960s counter culture and the British Poetry Revival London's underground histories the rise and fall of Thatcherism and Sinclair's writing about Britain under New Labour Sinclair's connection to other writers and artists such as J G Ballard Michael Moorcock and Marc Atkins This book makes a significant contribution to the growing scholarship surrounding Sinclair's work offering the first critical text that covers in detail all of Sinclair's work his poetry fiction non fiction including his book on John Clare Edge of the Orison and his film work
