Preaching Eugenics Christine Rosen, 2004-03-04 With our success in mapping the human genome the possibility of altering our genetic futures has given rise to difficult ethical questions Although opponents of genetic manipulation frequently raise the specter of eugenics our contemporary debates about bioethics often take place in a historical vacuum In fact American religious leaders raised similarly challenging ethical questions in the first half of the twentieth century Preaching Eugenics tells how Protestant Catholic and Jewish leaders confronted and in many cases enthusiastically embraced eugenics a movement that embodied progressive attitudes about modern science at the time Christine Rosen argues that religious leaders pursued eugenics precisely when they moved away from traditional religious tenets The liberals and modernists those who challenged their churches to embrace modernity became the eugenics movement's most enthusiastic supporters Their participation played an important part in the success of the American eugenics movement In the early twentieth century leaders of churches and synagogues were forced to defend their faiths on many fronts They faced new challenges from scientists and intellectuals they struggled to adapt to the dramatic social changes wrought by immigration and urbanization and they were often internally divided by doctrinal controversies among modernists liberals and fundamentalists Rosen draws on previously unexplored archival material from the records of the American Eugenics Society religious and scientific books and periodicals of the day and the personal papers of religious leaders such as Rev John Haynes Holmes Rev Harry Emerson Fosdick Rev John M Cooper Rev John A Ryan and biologists Charles Davenport and Ellsworth Huntington to produce an intellectual history of these figures that is both lively and illuminating The story of how religious leaders confronted one of the era's newest sciences eugenics sheds important new light on a time much like our own when religion and science are engaged in critical and sometimes bitter dialogue

Acts of Conscience Steven J. Taylor, 2009-07-10 In the mid to late 1940s a group of young men rattled the psychiatric establishment by beaming a public spotlight on the squalid conditions and brutality in our nation's mental hospitals and training schools for people with psychiatric and intellectual disabilities Bringing the abuses to the attention of newspapers and magazines across the country they led a reform effort to change public attitudes and to improve the training and status of institutional staff Prominent Americans such as Eleanor Roosevelt ACLU founder Roger Baldwin author Pearl S. Buck actress Helen Hayes and African American activist Mary McLeod Bethune supported the efforts of the young men These young men were among the 12,000 World War II conscientious objectors who chose to perform civilian public service as an alternative to fighting in what is widely regarded as America's good war Three thousand of these men volunteered to work at state institutions where they discovered appalling conditions Acting on conscience a second time they challenged America's treatment of its citizens with severe disabilities Acts of Conscience brings to light the extraordinary efforts of

these courageous men drawing upon extensive archival research interviews and personal correspondence The World War II conscientious objectors were not the first to expose public institutions and they would not be the last What distinguishes them from reformers of other eras is that their activities have faded from the professional and popular memory Taylor's moving account is an indispensable contribution to the historical record **Peculiar Places** Ryan Lee

Scientific Pollyannaism Oksana Yakushko,2019-06-24 This book argues that the story of the orphan girl Pollyanna namely her strategy of playing the glad games to manage loss abuse and social prejudice serves as a framework for critiquing historical forms of Western scientific Pollyannaism The author examines Pollyannaism as it relates to the sciences demonstrating how the approach has been used throughout modern Western history to enforce happiness and to criticize negative human emotional states These efforts carried out by scientists and popularized as scientific focus on negating the role of the environment and on promoting varied forms of emotional control Ultimately the book emphasizes strategies used to compel individuals into becoming Pollyannas about science itself

Theology and Down Syndrome Amos Yong,2007 While the struggle for disability rights has transformed secular ethics and public policy traditional Christian teaching has been slow to account for disability in its theological imagination Amos Yong crafts both a theology of disability and a theology informed by disability The result is a Christian theology that not only connects with our present social medical and scientific understanding of disability but also one that empowers a set of best practices appropriate to our late modern context Publisher description

The Other Side of the Scopes Monkey Trial Jerry Bergman,2023-10-26 The enormous amount of literature on the Scopes Trial focuses on the religious elements of the trial It almost totally ignored the importance of racism as taught in the text that Scopes used to teach biology Bryan was not concerned about evolution in general but specifically human evolution He believed that Darwin s theory as applied to humans encouraged the oppression of certain oppressed groups Taking evolution s philosophy to its logical conclusion meant justifying survival of the fittest in social matters This philosophy he learned from his extensive reading about WWI was a major factor influencing the Germans to fight in the first World War Furthermore Bryan believed the citizens of Tennessee had a right to determine what their children were taught in the public schools Another fact that is rarely mentioned is the main fossil evidence cited in the trial documents and the press in support of human evolution has been discredited by evolutionists including Neanderthal man Piltdown man Java man and Nebraska man Scopes was not a biology teacher but rather taught math His college degree was not in biology but law He was not put on the stand to testify in his trial probably because he never taught evolution and could not honestly answer questions about teaching it This book covers the so called trial of the century telling the real story of a sham brought on by the ACLU to further their political and anti Christian goals

Cruel Compassion Thomas Szasz,1998-02-01 Cruel Compassion is the capstone of Thomas Szasz s critique of psychiatric practices Reexamining psychiatric interventions from a cultural historical and political economic

perspective Szasz demonstrates that the main problem that faces mental health policy makers today is adult dependency. Millions of Americans diagnosed as mentally ill are drugged and confined by doctors for noncriminal conduct; go legally unpunished for the crimes they commit and are supported by the state not because they are sick but because they are unproductive and unwanted. Obsessed with the twin beliefs that misbehavior is a medical disorder and that the duty of the state is to protect adults from themselves, we have replaced criminal punitive sentences with civil therapeutic programs. The result is the relentless loss of individual liberty, erosion of personal responsibility, and destruction of the security of persons and property—symptoms of the transformation of a Constitutional Republic into a Therapeutic State unconstrained by the rule of law. Szasz shows convincingly that not until we separate therapy from coercion, much as the founders separated theology from coercion, shall we be able to get a handle on our seemingly intractable psychiatric and social problems. No contemporary thinker has done more than Thomas Szasz to expose the myths and misconceptions surrounding insanity and the practice of psychiatry. Now in *Cruel Compassion*, he gives us a sobering look at some of our most cherished notions about our humane treatment of society's unwanted and perhaps more importantly about ourselves as a compassionate and democratic people.

The Rhetoric of Eugenics in Anglo-American Thought Marouf Arif Hasian, 1996. Ranging in subject from England's poor laws to the Human Genome Project, *The Rhetoric of Eugenics in Anglo-American Thought* is one of the first books to look at the history and development of the eugenics movement in Anglo-American culture. Unlike other works that focus on the movement's historical aberrancies or the claims of its hardline proponents, this study highlights the often unnoticed ways in which the language and ideas of eugenics have permeated democratic discourse. Marouf A. Hasian Jr. not only examines the attempts of philosophers, scientists, and politicians to balance the rights of the individual against the duties of the state but also shows how African Americans, Catholics, women, and other communities dominant and marginalized have appropriated or confronted the rhetoric of eugenics. Hasian contends that eugenics is an ambiguous term that has allowed people to voice their concerns on a number of social issues—a form of discourse that influences the way ordinary citizens make sense of their material and spiritual world. While biological determinism and social necessity are discussed in the works of Plato, Malthus, and Darwin among others, with theories ranging from equality for all to natural superiority, it is Galton's observations on positive and negative eugenics that have been widely used to justify a variety of social and political projects, including the sterilization and segregation of the unfit, immigration restrictions, marriage regulations, substance abuse, physical and mental testing, and the establishment of health programs that sought to improve hygiene. Women, African Americans, and other marginalized communities, for instance, have at times lost reproductive rights in the name of liberty, opportunity, or necessity. Eugenical arguments are more than a creation of pseudo-science or misapplied genetical analysis; Hasian determines they are also rhetorical fragments representing the ideologies of multitudes of social actors who across time have reconfigured these ideas to legitimize many agendas.
