Mine Action After Diana Stuart Maslen, 2004 A radical critique of the conventions underlying family law practice

Mine Action After Diana Stuart Maslen, Richard Lloyd, 2004-05-20 In 1997 many countries came together to pledge 500 million over five years to mine action programmes to tackle the destruction caused by landmines Is the world a safer place as a result of the ban Has international mine action been a success What lessons have been learnt along the way What are the challenges for the future In short what is the true extent of Princess Diana's legacy Stuart Maslen assesses the effectiveness of mine awareness mine clearance operations victim assistance international law and stockpile destruction He outlines the global threat that mines present and the evolution of the mine action programme worldwide International Law, Politics, and Inhumane Weapons Alan Bryden, 2013 This book contributes to contemporary debates on the effectiveness of international humanitarian law IHL in regulating or prohibiting inhumane weapons such as landmines Two treaties have emerged under IHL in response to the humanitarian scourge of landmines However despite a considerable body of related literature clear understandings have not been established on the effectiveness of these international legal frameworks in meeting the challenges that prompted their creation This book seeks to address this lacuna An analytical framework grounded in regime theory helps move beyond the limitations in the current literature through a structured focus on principles norms rules procedures actors and issue areas On the one hand this clarifies how political considerations determine opportunities and constraints in designing and implementing IHL regimes On the other it enables us to explore how and why ideal policy prescriptions are threatened when faced with complex challenges in post conflict contexts This book will be of much interest to students of international humanitarian law global governance human security and IR in general

Foreign Aid and Landmine Clearance Matthew Breay Bolton, 2010-01-30 In the decade since the signing of the Ottawa Treaty which banned the production and use of anti personnel mines governments have spent over 3 billion on clearing up and mitigating the security threat of mines cluster munitions and other unexploded ordnance in the world's current and former war zones However this flow of cash into regions dominated by violent social structures raises numerous political issues Through detailed archival and field research this book explores the politics behind the allocation and implementation of foreign aid by the US and Norway for demining in Afghanistan Bosnia and Sudan It is an essential resource for practitioners and policymakers working in the field of landmine clearance and for students and researchers of Development Studies and post war reconstruction Landmine Monitor Report, 2004

Landmines in War and Peace Mike Croll, 2009-04-21 Land mines and their antecedents have been used on the battlefield from ancient times through the world wars to the modern conflicts in the developing world Their use in the developing world caused tens of thousands of civilian casualties and the resulting international outrage transformed rapidly into a highly effective global movement to ban land mines and a multi million dollar mine action business This book describes how technology and military tactics defined

land mine development and deployment why they are such an effective weapon of war and how an unlikely alliance of soldiers peace activists development workers and celebrities succeeded in banning the use of antipersonnel mines Comparisons are made between the post WW2 clearance of around 100 million land mines in Europe and contemporary efforts to clear a similar number in the developing world By 1947 Europe was largely mine free yet after nearly 20 years and expenditure of 4 billion the land mine crisis in the developing world continues The elusive search for the easy way to clear mines is described Despite experiments with machines airships rats and explosive clearance methods mine clearance remains a hazardous labor intensive task undertaken by teams of deminers using metal detectors and needle like probes

[Blinded by Humanity](#) Martin Barber, 2014-10-29 How to respond effectively to humanitarian crises is one of the most pressing and seemingly intractable problems facing the United Nations Martin Barber for many years a senior UN official and with decades of humanitarian experience here argues that the explanation for UN failures or only partial successes lies not with any lack of idealism or good intentions but with the constraints placed on aid workers by ill considered policies and poor practical application officials are blinded by humanity Barber presents an inside story based on personal hands on practical experience in Laos Thailand Afghanistan Bosnia Herzegovina and finally in Abu Dhabi where he advised the UAE government on its aid programme He tells of internal struggles at head office and the challenges of working in the field All the major UN activities and headaches are here including refugee work coordinating humanitarian aid peacekeeping the huge problem of de mining and the complex internal workings of the UN Secretariat A personal narrative and lessons drawn from direct experience provide the frame for an examination of major questions concerning the future of humanitarian response how effectively have international institutions discharged their responsibilities towards people affected by conflict Specifically how did the UN perform And how might the UN better help such people in the 21st century Barber analyses recent policy developments intended to improve the quality and effectiveness of the UN's work in humanitarian fields and assesses the extent to which recent reforms are likely to make the

UN a more effective partner for countries emerging from conflict In the final chapter he highlights seven blind spots whose significance has been consistently ignored or overlooked and in each case suggests a radical new approach Based on decades of personal experience and insider access this will be essential reading for students of international relations and politics as well as for all those directly or indirectly involved with humanitarian issues

Patrick Cottrell, 2016-04-21 International institutions constitute the basis of global order As they struggle to accommodate shifts in power and emerging threats their legitimacy their political authority and right to govern often comes under fire at times fuelling perceptions of crisis Yet scholars seldom ask why some institutions are replaced while others are not Blending theory with history M Patrick Cottrell examines some of the world's landmark security institutions arguing that the possibility of replacement hinges on the sources of institutional legitimacy and the nature and timing of the challenges to it The analysis not only reveals different pathways to replacement but also offers a window into the future including a potential dark side of too much legitimacy
