Music Silence:

"Silence, Music, Silent Music " Nicky Losseff, 2017-07-05 The contributions in this volume focus on the ways in which silence and music relate contemplate each other and provide new avenues for addressing and gaining understanding of various realms of human endeavour The book maps out this little explored aspect of the sonic arena with the intention of defining the breadth of scope and to introduce interdisciplinary paths of exploration as a way forward for future discourse Topics addressed include the idea of silent music in the work of English philosopher Peter Sterry and Spanish Jesuit St John of the Cross the apparently paradoxical contemplation of silence through the medium of music by Messiaen and the relationship between silence and faith the aesthetics of Susan Sontag applied to Cage's idea of silence silence as a different means of understanding musical texture ways of thinking about silences in music produced during therapy sessions as a form of communication music and silence in film including the idea that music can function as silence and the function of silence in early chant Perhaps the most all pervasive theme of the book is that of silence and nothingness music and spirituality a theme that has appeared in writings on John Cage but not in a broader sense in scholarly writing The book reveals that unexpected concepts and ways of thinking emerge from looking at sound in relation to its antithesis encompassing not just Western art traditions but the relationship between music silence the human psyche and sociological trends ultimately providing deeper understanding of the elemental places both music and silence hold within world philosophies and fundamental states of being Silence Music Silent Music will appeal to those working in the fields of musicology psychology of religion gender studies aesthetics and philosophy [Virtual Music](#) William Duckworth, 2013-01-11 Virtual Music How the Web Got Wired for Sound is a personal story of how one composer has created new music on the web a history of interactive music and a guide for aspiring musicians who want to harness the new creative opportunities offered by web composing Also includes a 4 page color insert **Heidegger and Music** Casey Rentmeester, Jeff R. Warren, 2022-02-02 Although philosophers have examined and commented on music for centuries Martin Heidegger one of the greatest philosophers of the 20th century had frustratingly little to say about music directly at least This volume the first to tackle Heidegger and music features contributions from philosophers musicians educators and musicologists from many countries throughout the world aims to utilize Heidegger's philosophy to shed light on the place of music in different contexts and fields of practice Heidegger's thought is applied to a wide range of musical spheres including improvisation classical music electronic music African music ancient Chinese music jazz rock n roll composition and musical performance The volume also features a wide range of philosophical insights on the essence of music music's place in society and the promise of music's ability to open up new ways of understanding the world with the onset of the technological and digital musical age Heidegger and Music breaks new philosophical ground by showcasing creative vignettes that not only push Heidegger's concepts in new directions but also get us to question the meaning of music in various contexts **Music and Light** Pasquale De Marco, Music and

Just Beyond Listening Michael C. Heller, 2023-11-14 Just Beyond Listening asks how we might think about encounters with sound that complicate standard accounts of aurality In a series of essays Michael C Heller considers how sound functions in dialogue with a range of sensory and affective modalities including physical co presence textual interference and spectral haunting The text investigates sound that is experienced in other parts of the body altered by cross wirings of the senses weaponized by the military or mediated and changed by cultural practices and memory Building on recent scholarship in sound studies and affect theory Heller questions not only how sound propagates acoustically but how sonic presences temper our total experience of the world around us Arvo Pärt Peter C. Bouteneff, Jeffers Engelhardt, Robert Saler, 2020-12-01 Scholarly writing on the music of Arvo Pärt is situated primarily in the fields of musicology cultural and media studies and more recently in terms of theology spirituality Arvo Pärt Sounding the Sacred focuses on the representational dimensions of Pärt's music including the trope of silence writing and listening past the fact that its storied effects and affects are carried first and foremost as vibrations through air impressing themselves on the human body In response this ambitiously interdisciplinary volume asks What of sound and materiality as embodiments of the sacred as historically specific artifacts and as elements of creation deeply linked to the human sensorium in Pärt studies In taking up these questions the book de Platonizes Pärt studies by demystifying the notion of a single Pärt sound It offers innovative critical analyses of the historical contexts of Pärt's experimentation medievalism and diverse creative work it re sounds the acoustic theological and representational grounds of silence in Pärt's music it listens with critical openness to the intersections of theology sacred texts and spirituality in Pärt's music and it positions sensing performing bodies at the center of musical experience Building on the conventional score biography and media based approaches this volume reframes Pärt studies around the materiality of sound its sacredness and its embodied resonances within secular spaces Expression of emotion in music and vocal communication Anjali Bhatara, Petri Laukka, Daniel J. Levitin, 2014-08-18 Two of the most important social skills in humans are the ability to determine the moods of those around us and to use this to guide our behavior To accomplish this we make use of numerous cues Among the most important are vocal cues from both speech and non speech sounds Music is also a reliable method for communicating emotion It is often present in social situations and can serve to unify a group's mood for ceremonial purposes funerals weddings or general social interactions Scientists and philosophers have speculated on the origins of music and language and the possible common bases of emotional expression through music speech and other vocalizations They have found increasing evidence of commonalities among them However the domains in which researchers investigate these topics do not always overlap or share a common language so

communication between disciplines has been limited The aim of this Research Topic is to bring together research across multiple disciplines related to the production and perception of emotional cues in music speech and non verbal vocalizations This includes natural sounds produced by human and non human primates as well as synthesized sounds Research methodology includes survey behavioral and neuroimaging techniques investigating adults as well as developmental populations including those with atypical development Studies using laboratory tasks as well as studies in more naturalistic settings are included
