Machine Bradley A. Fiske, 2025-05 *The navy as a fighting machine* is a military strategy work exploring the essential role of naval power in warfare and political stability. It emphasizes how a strong navy can prevent blockades, secure national trade, and strengthen defense. The book draws on historical examples to highlight the contributions of naval forces to military success and international relations. The author addresses fundamental questions about the purpose of naval forces, the components required for effective naval power, and the principles guiding naval design and operation. Central to the work is the argument that naval strength shapes the outcomes of wars and political conflicts, influencing a nation's territorial integrity and global position. The examination of historical patterns reveals an ongoing reliance on military power to resolve disputes, setting the foundation for an in-depth analysis of naval strategy. This exploration provides insights into how nations seeking power and stability can use naval force to navigate the challenges of the international stage. **The Navy as a Fighting Machine, By... Germany's Fighting Machine: Her Army, her Navy, her Airships and Why She Arrayed Them Against the Allied Powers of Europe Ernest Flagg Henderson,2020-09-28 When a great and extraordinary event takes place it is easy somewhere in the world to point to omens and prophecies that have heralded it But in the case of the present war we can see in the German newspapers how from month to month of the present year the struggle was felt to

be more and more imminent and how Russia the power that eventually precipitated the catastrophe was felt to be the center of real danger In well informed diplomatic circles writes the Magdeburger Zeitung in January 1914 the impression can not be concealed that in Russia at present there prevails a thoroughly hostile attitude to Germany and Austria Hungary and that the agitation in the czar s realm is greater even than during the last Balkan crisis It looks as though Russia were preparing to make an extraordinarily great show of strength against a specific not far distant date And the Deutsche Tageszeitung What is Russia s purpose in building a mighty fleet of dreadnaughts for the Baltic Surely not merely to coerce Sweden Again the Madgeburg paper The Russian government which already owes French capitalists twelve billions has received a new loan of two billions five hundred millions of which five million are yearly to be issued in Paris This whole gigantic sum is exclusively to be spent for building strategic railways along the German Russian boundary France compelled Russia to do this The French general staff thinks that Russia because of her clumsiness in mobilizing but especially for lack of tracks leading to the German frontier will not be able in a new war with Germany to bring help to France in time Russia has now fulfilled France s wishes in this regard Thus does the Franco Russian alliance which of late seemed to be falling into oblivion celebrate its resurrection In February the Hallesche Zeitung writes To keep friendship with Russia is one of the chief aims of our foreign policy but it is sometimes made very hard for us indeed They keep the peace because it is to the advantage of the czar s empire to do so but they are to be had for every combination directed against Germany And the Dresdener Nachrichten The Russian German relations leave very much to be desired at the moment The Russian government fails to show the least approachableness in foreign questions and Russian society and the press are in an extremely anti German mood Evidences of the same thing are to be seen in their attitude to Austria The Russian policy lets itself be taken more and more in tow by the French desires and has nothing but polite speeches left for Germany The Weser Zeitung finds the explanation of the hostility in Germany s efforts to help the Turks reorganize their army and declares Here we have touched one of the weakest spots in Russia s world policy her endeavor to get to the Mediterranean The Fr nkische Kurier thinks that Russia intends to form a protectorate over the Balkan states as a military weapon against Austria and her allies The soul of this endeavor is the Russian diplomacy and the Servian minister president Pasitsch The Dresdener Anzeiger observes that the influence of the Pan Slavist party over the Russian government is steadily growing and that the extraordinary activity in military matters ill suits the constant peace assurances The measures are pointed against Austria Hungary Germany's Fighting Machine Ernest F. Fighting Machines Dan Saxon, 2021-12-03 Lethal autonomous weapons are weapon systems that can select and destroy targets without intervention by a human operator Fighting Machines explores the relationship between lethal autonomous weapons LAWS the concept of human dignity and international law Much of this analysis speaks to three fundamental and related problems When a LAWS takes a human life is that killing a violation of human dignity Can states and non state actors use LAWS in accordance with international law And are there certain responsibilities of human decision making during wartime that we should not delegate to machines In the book Dan Saxon argues that the use of LAWS to take human life constitutes a violation of human dignity Rather than concentrating on the victims of the use of lethal force Saxon instead focuses on the technology and relevant legal principles and rules to advance several propositions First as LAWS operate at increasingly greater speeds their use will undermine the opportunities for and the value of human reasoning and judgment Second by transferring responsibility for reasoning and judgment about the use of lethal force to computer software the use of LAWS violates the dignity of the soldiers commanders and law enforcement officers who historically have made such decisions and therefore breaches international law Third weapon designs that facilitate teamwork between humans and autonomous systems are necessary to ensure that humans and LAWS can operate interdependently so that individuals can fulfil their obligations under international law including the preservation of their own dignity and ensure that human reasoning and judgment are available for cognitive functions better suited to humans than machines Fighting Machines speaks to the fields of international humanitarian law human rights criminal law and legal philosophy It will also be of interest to non lawyers especially military officers government policy makers political scientists and international relations scholars as well as roboticists and ethicists
