People In Places Experiencing Using And Changing The Built Environment:

Putting Folklore To Use Michael Owen Jones, 2014-07-11 The first book of its kind *Putting Folklore to Use* provides guidance to folklorists but also informs practitioners in other fields about how to use folklore studies to augment their own studies How can acting like a folklore fieldworker help a teacher reduce inter group stereotyping and increase student s self esteem How can adopting a folklore fieldworker s point of view when interviewing patients help practitioners render health care more effectively How can using folklore research help rural communities survive and thrive Thirteen folklorists provide answers to these and other questions and demonstrate the many ways folklore can be put to use Their essays commissioned for this volume and edited by Michael Owen Jones apply the methods and insights of modern folklore research to thirteen different professions and areas of practical concern The authors all of whom have themselves put folklore to use in the fields they describe consider applications in detail and explain how folkloristic concepts and techniques can enhance the work of various professions They explore applications in such areas as museums aiding the homeless environmental planning art therapy designing public spaces organization development tourism the public sector aging and creating an occupation s image In an extensive introduction to the volume Jones provides an overview of applied folkloristics that defines the field surveys its history in the United States and scrutinizes its basic issues and premises Part I of the book shows how to promote learning problem solving and cultural conservation through folklore and its study Part II deals with folklorists helping to improve the quality of life Part III reveals folklore s role in enhancing identity and community *Housing and Planning References* ,1979 *Children and Primary Geography* Patrick Wiegand, 1998-09-01 Primary teachers in the UK have to understand the National Curriculum and know how to implement it This text aims to provide primary teachers with a practical introduction to teaching geography at Key Stage 2 to Level 5 and beyond and is suitable for non specialists

Convivial Urban Spaces Henry Shaftoe, 2012 Despite developments in urban design during the last few decades architects urban planners and designers often continue to produce areas of bland commercially led urban fabric that deliver the basic functional requirements of shelter work and leisure but are socially unsustainable and likely generators of future problems *Convivial Urban Spaces* demonstrates that successful urban public spaces are an essential part of a sustainable built environment Without them we are likely to drift into an increasingly private and polarized society with all the problems that would imply Taking a multidisciplinary approach this book draws on research and the literature and theory of environmental psychology and urban design to advance our understanding of what makes effective public spaces Practical guidance is illustrated with case studies from the UK Spain Germany and Italy The result is a practical and clearly presented guide to urban public space for planners architects and students of the urban environment **Considering Research** Architectural Research Centers Consortium. Spring Conference, 2011 The premise of the conference was to assess the impact and relevance of contemporary paradigms in architectural research including substantial developments in technology public

consciousness and economic pressures Page 4 of printed paper wrapper **Experiencing Cities** Mark Hutter,2015-12-22

This extraordinary text for undergraduate urban students is a reflection of Mark Hutter's academic interests in urban sociology and his life long passion for experiencing city life His deep academic roots in the Chicago School of Sociology help inform and appreciate the variety of urban structures and processes and their effect on the everyday lives of people living in cities This text however extends the Chicago School perspective by combining its traditions with a social psychological perspective derived from symbolic interaction and also with a macro level examination of social organization social change stratification and power in the urban context informed by political economy This entirely new 3rd Edition has a global outlook on city life and a visual presentation unmatched among books in this genre **Cities, Change, and Conflict** Nancy

Kleniewski,Alexander R. Thomas,Gregory Fulkerson,2024-06-28 Cities Change and Conflict was one of the first texts to embrace the perspective of political economy as its main explanatory framework and then complement it with the rich contributions of human ecology as well as perspectives derived from critical approaches to social theory Although its primary focus is on North American cities the book contains several chapters on cities in other parts of the world including the Global North and Global South It provides both historical and contemporary accounts of the impact of globalization on urban development and urban institutions This sixth edition features a new groundbreaking chapter on the relationship between the physical environment and human settlements including the urban rural nexus This edition also expands and updates coverage of recent trends such as the establishment and evolution of gay neighborhoods the suburbanization of immigrant groups the situation of the immigrant youth known as Dreamers the reverse migration of Blacks from the North to the South and the proliferation of exurban communities Beyond examining the dynamics that shape the form and functionality of cities the text surveys the experience of urban life among different social groups including a new perspective on intersectionality as it affects people's experiences in cities It illuminates the workings of the urban economy local and federal governments and the criminal justice system while addressing policy debates and decisions that affect almost every aspect of urbanization and urban life **Two Degrees: The Built Environment and Our Changing Climate** Alisdair McGregor,Cole

Roberts,Fiona Cousins,2013-05-02 The Earth's temperature has been rising To limit catastrophic outcomes the international scientific community has set a challenging goal of no more than two degrees Celsius 3.6 degrees Fahrenheit average temperature rise Economists agree we will save trillions of dollars by acting early But how do we act successfully And what's the backup plan if we fall short Setting politics aside Two Degrees reviews the current science and explains how we can set practical steps to reduce the extent of warming and to adapt to the inevitable changes all while improving the bottom line beautifying our communities and increasing human health The book is a practical guide intended for a broad audience of those who occupy and shape our built environment The authors provide a clear framework for communities policy makers planners designers developers builders and operators to help manage the impacts and capture the opportunities of our

changing climate Two Degrees is divided into three sections Fundamentals Mitigation and Adaptation covering a diverse array of topics ranging from climate positive communities and low carbon buildings to the psychology of choice and the cost of a low carbon economy After a foreword by Amory Lovins more than 10 contributing authors share knowledge based on direct experience in all aspects of built environment practice This book clarifies the misconceptions provides new and unique insights and shows how a better approach to the built environment can increase resilience and positively shape our future

Data, Architecture and the Experience of Place Anastasia Karandinou, 2018-11-12 The notion of data is increasingly encountered in spatial creative and cultural studies Big data and artificial intelligence are significantly influencing a number of disciplines Processes methods and vocabularies from sciences architecture arts are borrowed discussed and tweaked and new cross disciplinary fields emerge More and more artists and designers are drawing on hard data to interpret the world and to create meaningful sensuous environments Architects are using neurophysiological data to improve their understanding of people s experiences in built spaces Different disciplines collaborate with scientists to visualise data in different and creative ways revealing new connections interpretations and readings This often demonstrates a genuine desire to comprehend human behaviour and experience and to possibly inform design processes accordingly At the same time this opens up questions as to why this desire and curiosity is emerging now how it relates to recent technological advances and how it converses with the cultural philosophical and methodological context of the disciplines with which it engages Questions are also raised as to how the use of data and data informed methods may serve support promote and or challenge political agendas Data Architecture and the Experience of Place provides an overview of new approaches on this significant subject and is ideal for students and researchers in digital architecture architectural theory design digital media sensory studies and related fields

Formal Methods in Architecture Sara Eloy, David Leite Viana, Franklim Morais, Jorge Vieira Vaz, 2021-01-04 This edited book gathers research studies presented at the 5th International Symposium on Formal Methods in Architecture 5FMA Lisbon 2020 Studies focus on the use of methodologies especially those that have witnessed recent developments that stem from the mathematical and computer sciences and are developed in a collaborative way with architecture and related fields This book constitutes a contribution to the debate and to the introduction of new methodologies and tools in the mentioned fields that derive from the application of formal methods in the creation of new explicit languages for problem solving in architecture and urbanism It adds valuable insight into the development of new practices solving identified societal problems and promoting the digital transformation of institutions in the mentioned fields The primary audience of this book will be from the fields of architecture urban planning civil engineering AEC landscape design computer sciences and mathematics both academicians and professionals
