the juxtaposition of cultures *Image Or Imagination? - The Problem of Photographic Representation* Anne Thoma, 2007-07 Seminar paper from the year 2006 in the subject Communications Theories Models Terms and Definitions grade 1 0 University of Tübingen Englisches Seminar course Key Terms for Studying Culture 39 entries in the bibliography language English abstract Altered pictures have always caused much controversy Even when photography was still in its infancy manipulative arrangement was already an issue Nowadays digital photography in particular faces an erosion of trust because newsmagazines and newspapers make frequent use of various manipulation techniques which fiercely challenges the shared belief that photographs record the world objectively and truthfully Oddly enough even though a picture may lie it is still used as evidence in the courtroom or understood as a valuable historical document In my analysis of photography's oscillation between image and imagination with the two terms representing something traditionally thought of as real on the one hand and something thought of as constructed on the other hand I want to address these questions and analyse how and what a picture represents I argue that meaning is to a large extent constructed by the viewer and does not exist as an inherent quality Consequently whether an altered picture is seen as fraud or merely as an optimisation is a very subjective matter and strongly depends on contextual information The viewer's judgement is influenced by the path through which the image is mediated and the context in which it is embedded but his judgement is also dependent on what the image means to him not only on what he sees in it This is not to say that photographs can under no circumstances be used as evidence However what can be said is that their truth value is often overestimated In any case manipulation is not a side effect that coincided with the birth of digital photography Selection framing and other adjustments have always played an important role in film photography After a gen **Photography and Philosophy** Scott Walden, 2010-03-29 This anthology offers a fresh approach to the philosophical aspects of photography The essays written by contemporary philosophers in a thorough and engaging manner explore the far reaching ethical dimensions of photography as it is used today A first of its kind anthology exploring the link between the art of photography and the theoretical questions it raises Written in a thorough and engaging manner Essayists are all contemporary philosophers who bring with them an exceptional understanding of the broader metaphysical issues pertaining to photography Takes a fresh look at some familiar issues photographic truth objectivity and realism Introduces newer issues such as the ethical use of photography or the effect of digital imaging technology on how we appreciate images **The Ones that are Wanted** Corinne Ann Kratz, 2002 The Ones That Are Wanted is a tour de force by virtue of the variety of expertises that Corinne Kratz brings together as photographer researcher curator evaluator and analyst of the exhibition and its reception The book sustains its focus on the Okiek pursues a coherent set of issues in depth grounds the argument in a rich empirical account and expands out to theoretical and ethical issues that transcend the immediate case Kratz's theoretical sophistication pertains not only to the ethnographic study of culture but also to the politics of representation and the particular nature of photography and exhibition as media Barbara Kirshenblatt Gimblett

author of *Destination Culture Tourism Museums and Heritage* Corinne Kratz establishes a new benchmark for visual anthropology and more generally for the photographic exhibit and the photographic essay forms She not only brings together extraordinary photography with intimate knowledge of the individuals rituals and history of costume changes She has the Okiek comment providing an experiential insiders sensibility to the exhibit And finally she puts the exhibit into motion ethnographically observing the exhibit s reception by very different audiences It becomes a polyvocal communicative performance piece transcending our usual notions of photographic books and exhibits Michael M J Fischer co author of *Anthropology as Cultural Critique An Experimental Moment in the Human Sciences* An exciting and groundbreaking work involving the innovative use of photography in cross cultural discourse that brings with it advances in method theory and interpretation in visual anthropology Howard Morphy Director of the Centre for Cross Cultural Research Australian National University and author of *Aboriginal Art Art Ideas* Auto Hans Hedberg, Gunilla Knappe, Tyrone Martinsson, Louise Wolthers, 2014 Today we are all photographers Self portraits are everywhere and snapshots of our lives are circulated and shared frenetically on various social media networks Distinctions are blurred not only between the private and public spheres but also between professional and amateur photographic practices This calls for increased knowledge about the performative characteristics of digitised and networked visual communication What are the limits of automation and what is the potential of virtuality Auto investigates how the everyday digital photography of our times challenges notions of autobiography interactivity and democracy
