The History of

the County Palatine and Duchy of Lancaster Edward Baines,1868 **Black 1919** Jacqueline Jenkinson,2009-05-01 The riots that broke out in various British port cities in 1919 were a dramatic manifestation of a wave of global unrest that affected Britain parts of its empire continental Europe and North America during and in the wake of the First World War During the riots crowds of white working class people targeted black workers their families and black owned businesses and property One of the chief sources of violent confrontation in the run down port areas was the colour bar implemented by the sailors trades unions campaigning to keep black Arab and Asian sailors off British ships in a time of increasing job competition Black 1919 sets out the economic and social causes of the riots and their impact on Britain s relationship with its empire and its colonial subjects The riots are also considered within the wider context of rioting elsewhere on the fringes of the Atlantic world as black people came in increased numbers into urban and metropolitan settings where they competed with working class white people for jobs and housing during and after the First World War The book details the events of the port riots in Britain with chapters devoted to assessing the motivations and make up of the rioting crowds examining police procedures during the riots considering the court cases that followed and looking at the longer term consequences for the black British workers and their families Black 1919 is a stark and timely reminder of the violent racist conflict that emerged after the First World War and the shockwaves that reverberated around the Empire City Status in the British Isles, 1830-2002 John Beckett,2017-07-05 Based on a wide variety of government and civic records this book traces the evolution of the changing nature of city status particularly through the nineteenth and twentieth centuries Beginning with an explanation of how city status first became connected to cathedrals in the medieval period the book explores how during the nineteenth century links evolved between Anglican diocesan sub divisions and city creation It then shows how in a few years between 1888 and 1907 the traditional interpretation of a city was overturned as the most major British industrial and commercial towns received city status and lord mayoralties The second half of the book concentrates on city status during the twentieth century and particularly the politicisation of the process and the linking of grants to royal occasions The study concludes by looking at the city status competitions of 2000 and 2002 in relation to the previous two hundred years of city history **Building on the past** Malpass, Peter,Cairncross, Liz,2006-03-29 Despite the improved supply and quality of housing in the UK and Europe over the last 60 years the future of housing remains uncertain Will the supply of new housing meet demand Is decent affordable housing an achievable goal How far will governments seek to shape the market How will they respond to demographic pressures in different parts of the country Will housing wealth become a central issue in wider debates about the future of public services This book looks at the big questions affecting the future of housing as a key indicator of social and economic well being in the 21st century It brings together specially commissioned contributions by leading housing experts who explore a wide range of themes and issues affecting the prospects for the coming 20 years or more Drawing on the evidence of the past and present they analyse the implications of current trends to consider how markets and

Municipal Journal ,1929 **The Dead City** Paul Dobraszczyk,2017-06-30 The Dead City unearths meanings from such depictions of ruination and decay looking at representations of both thriving cities and ones which are struggling abandoned or simply in transition It reveals that ruination presents a complex opportunity to envision new futures for a city whether that is by rewriting its past or throwing off old assumptions and proposing radical change Seen in a certain light for example urban ruin and decay are a challenge to capitalist narratives of unbounded progress They can equally imply that power structures thought to be deeply ingrained are temporary contingent and even fragile Examining ruins in Chernobyl Detroit London Manchester and Varosha this book demonstrates that how we discuss and depict urban decline is intimately connected to the histories economic forces power structures and communities of a given city as well as to conflicting visions for its future
