Saltwater in the Blood Easkey Britton, 2021-09-28 Powerful feminist nature writing by the pioneer of women s big wave surfing in Ireland Easkey Britton provides a rare female perspective on surfing exploring the mental skills it fosters and the need to recognize the value of the ocean and of nature s cycles in our lives This is an incredibly inspiring exploration of the sea s role in the wellness of people and the planet beautifully written by Easkey Britton surfer scientist and social activist She offers a powerful female perspective on the sea and surfing explaining what it s like to be a woman in a man s world and how she promoted the sport to women in Iran surfing while wearing a hijab She speaks of the undiscussed taboo around entering the water while menstruating and of how she has come to celebrate her own bodily cycles She has developed her own approach to surfing which instead of seeking to dominate the waves works in tune with the natural cycles of her body the moon and the seasons In a society that rewards busyness she believes that understanding the influence of cycles becomes even more important and we all have them men and women For Easkey the sea is a source of mental and physical wellbeing She explores the mental toughness needed in big wave surfing and presents surfing as an embodied mindfulness practice in which we can find flow and connect with the movement of the waves She stresses the need to recognize the ocean as our most powerful ally when addressing our greatest global challenge the climate crisis Above all Easkey s relationship to the sea has taught her about the need to meet life and evolve with it rather than seeking to control it By such wisdom our planet might just survive and thrive

disease The Sea Can Wash Away All Evils Kimberley Christine Patton, 2007 Kimberley Patton examines the environmental crises facing the world's oceans from the perspective of religious history. Much as the ancient Greeks believed and Euripides wrote that the sea can wash away all evils, a wide range of cultures have sacralized the sea, trusting in its power to wash away what is dangerous, dirty, and morally contaminating. The sea makes life on land possible by keeping it pure. Patton sets out to learn whether the treatment of the world's oceans by industrialized nations arises from the same faith in their infinite and regenerative qualities. Indeed, the sea's natural characteristics such as its vast size and depth, chronic motion and chaos, seeming biotic inexhaustibility, and unique composition of powerful purifiers, salt and water, support a view of the sea as a place capable of swallowing limitless amounts of waste. And despite evidence to the contrary, the idea that the oceans could be harmed by wasteful and reckless practices has been slow to take hold. Patton believes that environmental scientists and ecological advocates ignore this relationship at great cost. She bases her argument on three influential stories: Euripides' tragedy *Iphigenia in Tauris*, an Inuit myth about the wild and angry sea spirit Sedna who lives on the ocean floor with hair dirtied by human transgression, and a disturbing medieval Hindu tale of a lethal underwater mare. She also studies narratives in which the sea spits back its contents: sins, corpses, evidence of guilt long sequestered, suggesting that there are limits to the ocean's vast, salty heart. In these stories, the sea is either an agent of destruction or a giver of life, yet it is also treated as a passive receptacle. Combining a history of this ambivalence toward the world's oceans with a serious scientific analysis of modern marine pollution, Patton writes a compelling cross-disciplinary study that couldn't be more urgent or timely.

Physics of Blackness Michelle M. Wright, 2015-02-15 What does it mean to be Black? If Blackness is not biological in origin but socially and discursively constructed, does the meaning of Blackness change over time and space? In *Physics of Blackness: Beyond the Middle Passage Epistemology*, Michelle M. Wright argues that although we often explicitly define Blackness as a what, it in fact always operates as a when and a where. By putting lay discourses on spacetime from physics into conversation with works on identity from the African Diaspora, *Physics of Blackness* explores how Middle Passage epistemology subverts racist assumptions about Blackness yet its linear structure inhibits the kind of inclusive epistemology of Blackness needed in the twenty-first century. Wright then engages with bodies frequently excluded from contemporary mainstream consideration: Black feminists, Black queers, recent Black African immigrants to the West, and Blacks whose histories may weave in and out of the Middle Passage epistemology but do not cohere to it. *Physics of Blackness* takes the reader on a journey both known and unfamiliar, from Isaac Newton's laws of motion and gravity to the contemporary politics of diasporic Blackness in the academy, from James Baldwin's postwar trope of the Eiffel Tower as the site for diasporic encounters to theoretical particle physics, theory of multiverses, and superpositioning to the almost-erased lives of Black African women during World War II. Accessible in its style, global in its perspective, and rigorous in its logic, *Physics of Blackness* will change the way you look at Blackness. What Kind of Ancestor Do You Want to Be? John
