Verghese, Timothy D. Kane, 2021-10-05. This book highlights remarkable new endoscopic, laparoscopic, and thoracoscopic approaches to the removal of surgical lesions for different pathologic conditions under general endotracheal anesthesia in infants and children. It details how newer techniques in airway management, monitoring regional nerve blocks for these innovative minimally invasive approaches, have resulted in a decrease in intraoperative and postoperative morbidity and early recovery process after pediatric anesthesia. This unique book contains features that provide the audience with several clinical scenarios where exceptional surgical outcomes are achieved with optimum pre-op preparation via collaborative team efforts. To date, there is no other textbook emphasizing the anesthetic and surgical management during the most innovative advances in endoscopic surgery in children. Per-oral endoscopic myotomy (POEM) for the definitive treatment of achalasia in children is probably the most advanced endoscopic surgery done successfully in children. POEM is the best example of endoscopic surgery performed via natural orifices, known as the Natural orifice transluminal endoscopic surgery (NOTES). Another new laparoscopic surgical intervention, Median Arcuate Ligament surgical release for Median Arcuate Ligament Syndrome (MALS), for patients with Postural Orthostatic Tachycardia Syndrome (POTS), is described with established perioperative protocols emphasizing the need for early admission, intravenous hydration, and premedication. Novel approaches in the anesthetic management in children with short bowel syndrome, for bowel lengthening techniques like the serial transverse enteroplasty (STEP), and in teenagers for laparoscopic bariatric surgery with adjustable gastric banding (AGB) and vertical sleeve gastrectomy (VSG) for morbid obesity are new areas that would enlighten the readers. *Anesthetic Management in Pediatric General Surgery* is an invaluable resource for pediatric anesthesiologists, surgeons, and their trainees specializing in the care of pediatric patients. **Abeloff's Clinical Oncology E-Book** John E.
