conviction that we should not be discouraged by the public's reluctance to support space activity since all past human progress has been brought about by visionaries who did not have the backing of their contemporaries. The shock of realizing during the moon landings that contact with the vast and perhaps peril-fraught universe is no longer mere fiction dampened the enthusiasm of the majority but this was a natural reaction comparable seventeenth-century people's resistance to the idea that Earth is not as formerly thought safely enclosed within crystal spheres that hold up the celestial bodies. It will pass and we need have no doubt that generations who come after us will venture forth from this green Earth and find their way to the stars. The following essays are included: The Once and Future Dream, new Thoughts on the 50th Anniversary of the First Moon Landing, Breaking Out from Earth's Shell, Why Does the History of Outlook Toward Space Matter, Confronting the Universe in the Twenty-First Century, Space and Human Survival, The Only Sensible Way to Deal with Climate Change, Update on the Critical Stage, The Far Side of Evil's Relevance Today, Space Colonization, Faith and Pascal's Wager, Why There Will Never Be an Interplanetary War, Humankind's Future in the Cosmos. Earth is looking for the truth Hassan Khalil, 2024-11-24. A dialogue between the Earth and what is on it of mountains, rivers, and creatures to know the secret of its existence. In this dialogue, each creature talks about itself, why God created it, and what is the reason for its existence on Earth.
