Both the authors are inspired by the concept of a critical ethology oriented to archive the nature culture and human animal dichotomies The book proposes a theoretical and methodological restructuring of the comparative study of the animal behavior learning and cultures focused on the fact that thought culture and language are not exclusively human prerogatives The proposed analysis includes a critique of speciesism and determinism in the ethical field and converge with the Humanities to which the series is dedicated on a key point it is necessary to arrive at an education system able to offer scientific social and ethical skills that are trasversal and transcendent to the traditional humanities life sciences bipartition Skills that are indispensable for facing the complex challenges of the contemporary society and promoting a critical reflection of humanity on itself
