Loss Of Innocents Child Killers And Their Victims:

FBI Law Enforcement Bulletin ,2001 **The Loss of Innocents** Cara E. Richards,2000-03 Despite huge amounts of literature on child abuse there exists little information on situations in which children are killed Analyzing data from over 700 cases this study identifies specific types of perpetrators victims socio economic backgrounds and patterns of dangerous circumstances *Crimes of the Centuries* Steven Chermak Ph.D.,Frankie Y. Bailey,2016-01-25 This multivolume resource is the most extensive reference of its kind offering a comprehensive summary of the misdeeds perpetrators and victims involved in the most memorable crime events in American history This unique reference features the most famous crimes and trials in the United States since colonial times Three comprehensive volumes focus on the most notorious and historically significant crimes that have influenced America s justice system including the life and wrongdoing of Lizzie Borden the bombing of the Sixteenth Street Baptist Church the killing spree and execution of Ted Bundy and the Columbine High School shootings Organized by case the work includes a chronology of major unlawful deeds fascinating primary source documents dozens of sidebars with case trivia and little known facts and an overview of crimes that have shaped criminal justice in the United States over several centuries Each of the 500 entries provides information about the crime the perpetrators and those affected by the misconduct along with a short bibliography to extend learning opportunities The set addresses a breadth of famous trials across American history including the Salem witch trials the conviction of Sacco and Vanzetti and the prosecution of O J Simpson *Engendered Death* Joseph W. Laythe,2011-12-16 Engendered Death Pennsylvania Women Who Kill is an historical and interdisciplinary study of women who kill in Pennsylvania from the 18th century to the present It is not an examination of what motivates women to kill although the reader may deduce that from the case studies included Instead it is an examination of how society perceives women who kill and how the gender lens is applied to them throughout the legal process in the media and in the courtroom What makes this work particularly unique is its combination of both scholarly analysis and narrative case studies As such it will appeal to both the scholar and the reader of true crime non fiction If we are to recognize the complex variables at play in all criminal offenses we will need to understand that the laws of a community its social values its politics economics and even geography play a factor in what laws are enforced and against whom they are enforced The decision to define and label certain behaviors and certain people was based on social political and economic considerations of each community Thus the commission of murder by a woman in Arizona may have a variety of factors associated with it that are not present in the case of a woman who murdered her husband in Maine This study in part because of the volume of cases and in part to limit the variables affecting the cases has limited its scope of women killers to the state of Pennsylvania Pennsylvania is the ideal state to study because of its long and stable legal and political traditions its historically diverse population and the large number of newspapers that will help us gauge the public s view of women and women who kill By limiting our scope to one state we know that the legal definitions are fairly consistent for all

of the women during a certain period and we can more easily identify the shifts in social values regarding women and homicide
