Magic Mineral To Killer Dust:

Magic Mineral to Killer Dust Geoffrey Tweedale, 2000-03-16 Asbestos was once known as the magic mineral because of its ability to withstand flames Yet since the 1970s it has become a notorious and feared killer dust that is responsible for thousands of deaths and an epidemic that continues into the new millennium This is the first comprehensive account of the UK asbestos health problem which provides an in depth look at the occupational health experience of one of the world's leading asbestos companies British asbestos giant Turner Newall Based on a vast company archive recently released in American litigation Magic Mineral to Killer Dust gives an unprecedented insight into all aspects of the asbestos hazard dust control workmen's compensation government regulation and the development of medical knowledge In particular it looks at the role of industrialists doctors factory inspectors and trades unionists highlighting the failures in regulation that allowed the commercial development of a material that was known to be lethal since at least 1900 Magic Mineral to Killer Dust

Geoffrey Tweedale, 2003 **Liability of Corporate Groups and Networks** Christian A. Witting, 2018-01-11 What happens when a corporate subsidiary or network company is unable to pay personal injury victims in full This book sets out to tackle the insolvent entity problem especially as it arises in cases of mass wrongdoing such as those involving asbestos exposure and defective pharmaceuticals After discussing the nature of corporate groups and networks from the perspectives of business history organisation studies and social theory the book assesses a range of rules and proposed rules for extending liability for personal injuries beyond insolvent entities New proposals are put forward for an exception to the rule of limited liability and for the development of a flexible new tort based on conspiracy that encompasses not only control based relationships but also horizontal coordination between companies The book concludes with a general discussion of lessons learned from debates about extended liability and provides guidelines for the development of new liability rules

Perspectives on Causation Richard Goldberg, 2011-10-21 The chapters in this volume arise from a conference held at the University of Aberdeen concerning the law of causation in the UK Commonwealth countries France and the USA The distinguished group of international experts who have contributed to this book examine the ways in which legal doctrine in causation is developing and how British law should seek to influence and be influenced by developments in other countries As such the book will serve as a focal point for the study of this important area of law The book is organised around three themes the black letter law scientific evidence and legal theory In black letter law scholarship major arguments have emerged about how legal doctrine will develop in cases involving indeterminate defendants and evidential gaps in causation Various chapters examine the ways in which legal doctrine should develop over the next few years in particular in England Scotland Canada and the USA including the problem of causation in asbestos cases In the area of scientific evidence its role in the assessment of causation in civil litigation has never been greater The extent to which such evidence can be admitted and used in causation disputes is controversial This section of the book is therefore devoted to exploring the role of statistical

evidence in resolving causation problems including recent trends in litigation in the UK USA Australia and in France and the question of liability for future harm In the legal theory area the so called NESS necessary element in a sufficient set test of causation is discussed and defended The importance of tort law responding to developing science and observations from the perspective of precaution and indeterminate causation are also explored The book will be of interest to legal academics policy makers in the field specialist legal practitioners those in the pharmaceutical and bioscience sectors physicians and scientists

Protestant Nonconformity and Christian Missions Martin Wellings,2014-02-01 The aim of the book is to explore some of the contributions made by Protestant Nonconformity to Christian missions The occasion of the conference which gave rise to the volume was the centenary of the Edinburgh Missionary Conference of 1910 but the topics treated here deliberately range more widely covering missions in Britain and the wider world from the eighteenth to the twentieth century COMMENDATIONS Martin Wellings is to be warmly thanked for gathering such an informative and stimulating collection of papers They are scholarly and accessible and deserve to be widely read Alan P F Sell University of Wales Trinity Saint David UK

T&T Clark Companion to Nonconformity Robert Pope,2013-11-21 Protestant Nonconformity the umbrella term for Congregationalists Presbyterians Baptists Methodists and Unitarians belongs specifically to the religious history of England and Wales Initially the result of both unwillingness to submit to the State s interference in Christian life and a dissatisfaction with the progress of reform in the English Church Nonconformity has been primarily motivated by theological concern ecclesial polity devotion and the nurture of godliness among the members of the church Alongside such churchly interests Nonconformity has also made a profound contribution to debates about the role of the State to family life and education culture in general trade and industry the development of philanthropy and charity and the development of pacifism In this volume for the first time Nonconformity and the breadth of its activity come under the expert scrutiny of a host of recognised scholars The result is a detailed and fascinating account of a movement in church history that while currently in decline has made an indelible mark on social political economic and religious life of the two nations

When the Air Became Important Janet Greenlees,2019-03-15 Janet Greenlees examines the working environments of the heartlands of the British and American cotton textile industries from the nineteenth to the late twentieth centuries She contends that the air quality within these pioneering workplaces was a key contributor to the health of the wider communities of which they were a part

Beyond the Factory Gates Peter Bartrip,2006-07-01 *Beyond the Factory Gates* examines the issue of asbestos and health in the USA between the early 1900 s to the mid 1970s Areas covered include the emergence of medical concern about the three fatal diseases related to asbestos asbestosis lung cancer and mesothelioma the actions of the US Navy the main consumer of asbestos based insulation products the response of the federal government before and after enactment of the Occupational Safety and Health Act in 1970 and the roles of organized labour and the asbestos industry The book provides an important insight into occupational health and its regulation in twentieth century America and is original in several ways

First there is no satisfactory history of asbestos health and medicine in the USA a major gap in the literature Second no previous publication has examined the asbestos issue beyond the factory gates in a non manufacturing context and explored the complex interactions between organised labour the US Government business corporations and the US navy Finally Beyond the Factory Gates avoids the one sided anti business interpretations that predominate much of the existing literature It accepts that the history of asbestos is in many ways a human tragedy but it rejects simplistic universalised arguments that this has been a tragedy with a cast only villains dupes and victims Compensating Asbestos Victims Andrea

Boggio,2016-05-23 This book traces the emergence and transformations of asbestos compensation to explore the wider issue of to what extent legal systems have converged in the era of globalization Examining the mechanism by which asbestos compensation is delivered in Belgium England Italy and the United States as well as the cultural forces and actors which contribute to its emergence and transformations the book advances our understanding of how law operates within cultural norms routines and institutional relations of capitalist societies With material gathered from 50 interviews and from primary and secondary sources the author considers law as a cultural phenomenon national styles of legal culture and the convergence and divergence of legal cultures and law as a form of institutionalized power *Defending the Indefensible*

Jock McCulloch,Geoffrey Tweedale,2008-07-24 In the early twentieth century asbestos had a reputation as a lifesaver In 1960 however it became known that even relatively brief exposure to asbestos can cause mesothelioma a virulent and lethal cancer Yet the bulk of the world s asbestos was mined after 1960 Asbestos usage in many countries continued unabated This is the first global history of how the asbestos industry and its allies in government insurance and medicine defended the product throughout the twentieth century It explains how mining and manufacture could continue despite overwhelming medical evidence as to the risks The argument advanced in this book is that asbestos has proved so enduring because the industry was able to mount a successful defense strategy for the mineral a strategy that still operates in some parts of the world This defence involved the shaping of the public debate by censoring and sometimes corrupting scientific research nurturing scientific uncertainty and using allies in government insurance and medicine The book also discusses the problems of asbestos in the environment compensating victims and the continued use of asbestos in the developing world Its global focus shows how asbestos can be seen as a model for many occupational diseases indeed for a whole range of hazards produced by industrial societies The book is based on a wealth of documentary material gained from legal discovery supplemented by evidence from the authors visits and researches in the US the UK Canada Kazakhstan Zimbabwe Australia Swaziland and South Africa
