Magic, Science and Religion and Other Essays. Illustrated Bronisław Malinowski, 2025-06-03 Magic Science and Religion and Other Essays is a collection of thought provoking essays by Bronisław Malinowski a pioneering figure in anthropology Originally published in 1948 the compilation addresses the interplay between magic science and religion in human societies Malinowski explores the role of magic as a practical tool science as a systematic understanding of the world and religion as a framework for addressing existential questions Drawing from his extensive fieldwork including studies among the Trobriand Islanders Malinowski provides valuable insights into the cultural dynamics that shape these domains The essays offer a comprehensive perspective on the complex relationships between belief systems and the social structures of different communities This anthology remains a seminal work in anthropology showcasing Malinowski's enduring influence on the understanding of human culture and belief systems *Magic, Science and Religion, and Other Essays* Bronisław Malinowski, 2013-10 This is a new release of the original 1948 edition **Magic, Science and Religion and the Scope of Rationality** Stanley J. Tambiah, 1990-03-22 This accessible and illuminating book explores the classical opposition between magic science and religion **RUDOLF BULTMANN** Adriano da Silva Carvalho, 2024-11-13 The work of theologian Rudolf Bultmann is often judged without due consideration of the historical and personal circumstances in which it occurred It is forgotten that theology is always carried out in a specific context Thus this book aims to do justice to this theologian by recognizing the relevance of his hermeneutical method It will be demonstrated that demythologization is a powerful exegetical apologetic operation because at the same time that it points to the mythological layer that covers the text of the New Testament it emancipates it from myth The next step will be to show that by recognizing a mythological envelope covering the text of the New Testament Bultmann intended to prove that the mythological vision itself had a fundamentally existential purpose This is because mythological language does not present an objective image of the world as it is on the contrary it seeks to communicate the understanding that man has of himself in the world in which he lives Therefore the myth should be interpreted not cosmologically but anthropologically or better still existentially It is therefore from this perspective that Bultmann seeks to highlight the relevance of the message of the New Testament **Theorizing Rituals, Volume 1: Issues, Topics, Approaches, Concepts** Jens Kreinath, J.A.M. Snoek, Michael Stausberg, 2018-08-14 Volume one of Theorizing Rituals assembles 34 leading scholars from various countries and disciplines working within this field The authors review main methodological and meta theoretical problems part I followed by some of the classical issues part II Further chapters discuss main approaches to theorizing rituals part III and explore some key analytical concepts for theorizing rituals part IV The volume is provided with extensive indices **Durkheim on Religion** Emile Durkheim, 2011-01-27 The famous French sociologist Emile Durkheim is universally recognised as one of the founding fathers of sociology as an academic discipline He wrote on the division of labour methodology suicide and education but his most

prolific and influential works were his writings on religion which culminated in his controversial book *The Elementary Forms of the Religious Life*. Although his influence continued long after his death in 1917 this is the first book to provide a detailed look at the whole of his work in the field of religion. *Durkheim on Religion* is a selection of readings from Durkheim's writings on religion presented in order of original publication ranging from early reviews to articles and extracts from his books. Also included are detailed bibliographies and abstracts together with contributions by such writers as Van Gennep, Goldenweiser and Stanner. This book will be invaluable to those studying sociology and anthropology but will also be of interest to those studying the history or philosophy of religion as well as to anyone with an interest in Durkheim. **Macmillan Student**

The book explains all the important sociological terms, theories, concepts and proper names whether they come from the classic nineteenth century traditions or from recent radical trends from the realms of abstract theory to issues of immediate social concern. There are over 2000 entries arranged in alphabetical order. All entries start with simple concise definitions but many go on to provide full length original essays.

Encyclopedia of Anthropology H. James Birx, 2006. Focuses on physical, social and applied anthropology, archaeology, linguistics and symbolic communication. Topics include hominid evolution, primate behaviour, genetics, ancient civilizations, cross cultural studies and social theories. Reason and Morality Joanna Overing, 2003-12-16. First Published in 1985. What is the place of reason and conversely of the unreasonable, the contradictory, the emotional and the chaotic in social life? What is the nature of general human rationality? Are there such things as incommensurable world views? How efficacious are typologies or modes of thought or cognitive styles? These are some of the controversies addressed by the contributors to this volume which draws together papers from the 1984 Malinowski Centennial Conference of the ASA. **Esotericism and the Academy** Wouter J. Hanegraaff, 2012-01-19. The neglected history of how intellectuals since the Renaissance have approached ideas of the occult which challenged biblical religion.
