Magical Thinking:

The 7 Laws of Magical Thinking Matthew Hutson, 2013-02-26 In this witty and perceptive debut a former editor at Psychology Today shows us how magical thinking makes life worth living Psychologists have documented a litany of cognitive biases misperceptions of the world and explained their positive functions Now Matthew Hutson shows us that even the most hardcore skeptic indulges in magical thinking all the time and it's crucial to our survival Drawing on evolution cognitive science and neuroscience Hutson shows us that magical thinking has been so useful to us that it's hardwired into our brains It encourages us to think that we actually have free will It helps make us believe that we have an underlying purpose in the world It can even protect us from the paralyzing awareness of our own mortality In other words magical thinking is a completely irrational way of making our lives make rational sense With wonderfully entertaining stories personal reflections and sharp observations Hutson reveals our deepest fears and longings He also assures us that it is no accident his surname contains so many of the same letters as this imprint

Literature, Technology and Magical Thinking, 1880-1920 Pamela Thurschwell, 2001-07-05 In this 2001 book Pamela Thurschwell examines the intersection of literary culture the occult and new technology at the fin de siècle Thurschwell argues that technologies began suffusing the public imagination from the mid nineteenth century on they seemed to support the claims of spiritualist mediums Talking to the dead and talking on the phone both held out the promise of previously unimaginable contact between people both seemed to involve magical thinking Thurschwell looks at the ways in which psychical research the scientific study of the occult is reflected in the writings of such authors as Henry James George du Maurier and Oscar Wilde and in the foundations of psychoanalysis This study offers provocative interpretations of fin de siècle literary and scientific culture in relation to psychoanalysis queer theory and cultural history

Magic and the Mind Eugene Subbotsky, 2010-03-31 Magical thinking and behavior have traditionally been viewed as immature misleading alternatives to scientific thought that in children inevitably

diminish with age In adults these inclinations have been labeled by psychologists largely as superstitions that feed on frustration uncertainty and the unpredictable nature of certain human activities In *Magic and the Mind* Eugene Subbotsky provides an overview of the mechanisms and development of magical thinking and beliefs throughout the life span while arguing that the role of this type of thought in human development should be reconsidered Rather than an impediment to scientific reasoning or a byproduct of cognitive development in children magical thinking is an important and necessary complement to these processes enhancing creativity at problem solving and reinforcing coping strategies among other benefits In adults magical thinking and beliefs perform important functions both for individuals coping with unsolvable problems and stressful situations and for society enabling mass influence and promoting social harmony Operating in realms not bound by physical causality such as emotion relationships and suggestion magical thinking is an ongoing developing psychological mechanism that Subbotsky argues is integral in the contexts of politics commercial advertising and psychotherapy and undergirds our construction and understanding of meaning in both mental and physical worlds *Magic and the Mind* represents a unique contribution to our understanding of the importance of magical thinking offering experimental evidence and conclusions never before collected in one source It will be of interest to students and scholars of developmental psychology as well as sociologists anthropologists and educators
