Magnum Stories:

Magnum Stories Chris Boot, 2014-03-17 This book explores the photo story through 61 master classes by some of the world's greatest photographers all members of the international photographic agency Magnum Friendship and Faith: Cistercian Men, Women, and Their Stories, 1100-1250 Brian Patrick McGuire, 2024-10-28 In these articles Professor McGuire explores the riches of the Cistercian exemplum tradition. These texts are made up of brief stories often with a miraculous content which provided moral support for novices and monks in Cistercian abbeys all over Europe in the High Middle Ages. The Cistercians have been seen mainly in terms of their great writers like Bernard of Clairvaux and the impressive buildings they left behind. But Cistercian literature also provides us with more humble insights from daily life shedding light on questions of sexuality, anger, depression, and bonds of friendship also between monks and nuns. They bring a freshness of insight and immediate experience and their seeming naivety lets us be aware of monks' commitment to each other in individual and community bonds. In Cistercian storytelling the Gospel's message meets an historical context and bears witness to a transformation of Christian life and idealism while at the same time allowing us precious insights into how ordinary men and women not just monks and nuns lived and thought.

Cistercian Stories for Nuns and Monks Martha G. Newman, 2020-10-30 Around the year 1200 the Cistercian Engelhard of Langheim dedicated a collection of monastic stories to a community of religious women. Martha G. Newman explores how this largely unedited collection of tales about Cistercian monks illuminates the religiosity of Cistercian nuns. As did other Cistercian storytellers, Engelhard recorded the miracles and visions of the order's illustrious figures but he wrote from Franconia in modern Germany rather than the Cistercian heartland. His extant texts reflect his interactions with non-Cistercian monasteries and with Langheim's patrons rather than celebrating Bernard of Clairvaux. Engelhard was conservative, interested in maintaining traditional Cistercian patterns of thought. Nonetheless, by offering to women a collection of narratives that explore the oral qualities of texts, the nature of sight, and the efficacy of sacraments, Engelhard articulated a distinctive response to the social and intellectual changes of his period. In analyzing Engelhard's stories, Newman uncovers an understudied monastic culture that resisted the growing emphasis on the priestly administration of the sacraments and the hardening of gender distinctions. Engelhard assumed that monks and nuns shared similar interests and concerns and he addressed his audiences as if they occupied a space neither fully sacerdotal nor completely lay, neither scholastic nor unlearned, and neither solely male nor only female. His exemplary narratives depict the sacramental value of everyday objects and behaviors whose efficacy relied more on individual spiritual formation than on sacerdotal action. By encouraging nuns and monks to imagine connections between heaven and earth, Engelhard taught faith as a learned disposition. Newman's study demonstrates that scholastic questions about signs, sacraments, and sight emerged in a narrative form within late twelfth-century monastic communities.

New Ways of Seeing Grant Scott, 2020-08-12 Those born since the digital revolution seem to have the hardest time re imagining the role of photography in the world today Thinking of photography as a visual language is the approach this book adopts to address this challenge Considering photography in this way develops the metaphor of learning a language when attempting to explain what photography can be and what it can give a student in transferable creative and life skills This begins with challenging the pre conception that successful photography is defined by the successful single image or the good photograph The book emphasises the central role of narrative and visual storytelling through a technique of photosketching to develop the building blocks of visual creativity and ultimately to craft successful bodies of photographic work New Ways of Seeing explains how to both learn and teach photography as a visual language appropriate for both professionals and students working today
