Textiles, Text, Intertext Maren Clegg Hyer, Jill Frederick, 2016 The theme of weaving a powerful metaphor within Anglo Saxon studies and Old English literature itself unites the essays collected here They range from consideration of interwoven sources in homiletic prose and a word weaving poet to woven riddles and iconographical textures in medieval art and show how weaving has the power to represent textiles texts and textures both literal and metaphorical in the early medieval period They thus form an appropriate tribute to Professor Gale R Owen Crocker whose own scholarship has focussed on exploring woven works of textile and dress manuscripts and text and other arts of the Anglo Saxon peoples Global Warming and Population Responses among Great Plains Birds Paul Johnsgard, 2015-02-19 Based on an analysis of 47 years 1967 2014 of Audubon Christmas Bird Counts CBC evidence for population changes and shifts in early winter late December ranges of nearly 150 species of birds in the Great Plains states is summarized a region defined as including the Dakotas Nebraska Kansas Oklahoma and the Texas panhandle The rationale for this study had its origins in Terry Root's 1988 Atlas of North American Wintering Birds The present analysis includes all of the 40 annual CBC surveys from the 1967 8 to the 2006 7 counts plus the results of the most recent 2013 14 CBC The present summary quantitatively describes the early winter abundance for 147 of the most commonly encountered regional species illustrating their temporal changes in geographic distributions and relative abundance between 1967 and 2014 Publisher description The Ecology of Spacing Behavior in the Yellow-billed Magpie (Pica Nuttalli) Mark DuValle Reynolds, 1990 Competition , 2009-01-01 The Super Bowl Democrats vs Republicans Ford vs Chevy Bloods vs Crips Public vs private schools Sibling rivalries Competition permeates every aspect of our society and we place great confidence in its ability to allocate resources efficiently spur innovation and build personal character As others have argued competition is now a paradigm a conceptual framework that is often taken for granted but rarely challenged In this book experts examine competition from their own disciplinary perspectives From economics to philosophy biology to education and psychology to politics the origins and applications of this paradigm are placed in historical context its mechanics are analyzed and its costs and benefits are assessed The questions addressed in this book are important and varied What is the historical genesis of the competition paradigm How is competition manifest in our culture in religion politics economics sports business and education and are its effects always beneficial What can we learn about the mechanics of competition from studying nature Are humans naturally competitive or is it a learned behavior How does competition affect our mental and physical well being Is competition the best strategy for allocating finite planetary resources to an expanding human population The book also engages a cooperative alternative and asks Is there an ethical tension between competition and cooperation Why have cooperative models been undervalued and marginalized Can cooperation increase innovation and efficiency This collection provides a broad insightful and productive examination of one

of the dominant concepts of our time *Feminism and Evolutionary Biology* Patricia Gowaty, 2012-12-06 Standing at the intersection of evolutionary biology and feminist theory is a large audience interested in the questions one field raises for the other Have evolutionary biologists worked largely or strictly within a masculine paradigm seeing males as evolving and females as merely reacting passively or carried along with the tide Would our view of nature red in tooth and claw be different if women had played a larger role in the creation of evolutionary theory and through education in its transmission to younger generations Is there any such thing as a feminist science or feminist methodology For feminists does any kind of biological determinism undermine their contention that gender roles purely constructed not inherent in the human species Does the study of animals have anything to say to those preoccupied with the evolution and behavior of humans All these questions and many more are addressed by this book whose contributing authors include leading scholars in both feminism and evolutionary biology Bound to be controversial this book is addressed to evolutionary biologists and to feminists and to the large number of people interested in women's studies

Avian Brood Parasitism Manuel Soler, 2018-05-02 Brood parasitism has become one of the most flourishing areas of research in evolutionary ecology and one of the best model systems for investigating coevolution This subject has undergone remarkable advances during the last two decades but has not been covered by any book in the 21st century This book offers a comprehensive and up to date overview of the fascinating field of avian brood parasitism The topics covered include conspecific brood parasitism evolution and phylogenetic history of avian brood parasites parasitic behaviour used by brood parasites adaptations and counter adaptations of brood parasites and their hosts at every stage of the breeding cycle before laying egg chick and fledgling stages factors affecting the evolution of host defences and parasitic attacks the role of phenotypic plasticity in host defences mechanisms driving egg recognition and rejection evolution of nest sharing or nest killing by brood parasite chicks begging behaviour in parasitized nests and food delivery by host adults and recognition of conspecifics by juvenile brood parasites This volume provides a comprehensive reference resource for readers and researchers with an interest in birds behaviour and evolution as well as a source of hypotheses and predictions for future investigations into this dynamic subject
