The Tawhidi Methodological Worldview Masudul Alam Choudhury, 2019-07-17 This book develops and applies the methodology of Tawhid monotheism as law and the Sunnah the teachings of Prophet Muhammad in the Qur'an in establishing a transdisciplinary foundation for the study of Islamic economics finance society and science It employs the Tawhidi String Relation TSR a new theoretical framework in contemporary Islamic sciences in the methodological formalisation and application of the Tawhidi worldview as the primal ontological law of monotheism It employs a deeply Qur'anic exegesis and a mathematical philosophical and socio scientific mode of inquiry in deriving developing and empirically

applying the Qur'anic methodology of unity of knowledge. It is the first book of its kind in rigorously studying the true foundation of the Qur'anic concept of everything as the world system extending between the heavens and Earth. The Qur'anic terminology of the precept of this world system in its most comprehensive perspective is Al-Lameen, the terminology in the Qur'an that accounts for the generality and details of the world systems that are governed by the method of evaluation of the objective criterion of wellbeing. Wellbeing, objective criterion, is evaluated subject to inter-causal relations between systemic entities, variables, and functions. The cardinal principle of Tawhid in its relationship with the world system conveys the corporeal meaning of monotheism in its cognitive implication of abstraction and application. Such a study has not been undertaken in existing Islamic socio-scientific literature in analysing Islamic economics, finance, science, and society collectively using Tawhidi law as a theoretical framework. This book will be relevant to all such scholars who are interested in studying the monotheistic law and the Islamic principles, particularly Tawhid, Shari'ah, and Islamic philosophical thought.

Islamic Economics Taha Eğri, Necmettin Kizilkaya, 2015-06-18. Studies conducted in the field of Islamic economics lose their relevance over time. Works examining Islamic economics since the 1970s have been co-opted by the existing economic system and have become limited to a large extent as they are now only concerned with financial transactions. In fact, Islamic economics as a concept should actually be conceptualized as an alternative economic system. However, because of the financial and commercial transactions implemented in daily economic life,
