Maintaining Effective Token Economies

Gordon R. Foxall

Maintaining Effective Token Economies:

Maintaining Effective Token Economies Roger L. Patterson, 1976 **The Token Economy** Alan Kazdin, 2012-12-06

Applications of operant techniques in treatment and education have proliferated in recent years. Among the various techniques, the token economy has been particularly popular. The token economy has been extended to many populations included in psychiatry, clinical psychology, education, and the mental health fields in general. Of course, merely because a technique is applied widely does not necessarily argue for its efficacy. Yet the token economy has been extensively researched. The main purpose of this book is to review, elaborate, and evaluate critically research bearing on the token economy. The book examines several features of the token economy, including the variables that contribute to its efficacy, the accomplishments, limitations, and potential weaknesses, and recent advances. Because the token economy literature is vast, the book encompasses programs in diverse treatment, rehabilitation, and educational settings across a wide range of populations and behaviors. Within the last few years, a small number of books on token economies have appeared. Each of these books describes a particular token economy in one treatment setting, details practical problems encountered, and provides suggestions for administering the program. This focus is important but neglects the extensive scholarly research on token economies. The present book reviews research across diverse settings and clients. Actually, this focus is quite relevant for implementing token economies because the research reveals those aspects and treatment variations that contribute to or enhance client performance.

Handbook of Behavior Therapy in the Psychiatric Setting Alan S. Bellack, Michel Hersen, 2013-11-21

Focusing on patients with severe impairments, including mixed and multiple diagnoses, this volume describes how behavior therapy fits into the clinical environment. Psychiatrists, medical clinicians, and residents will appreciate the in-depth coverage of a broad range of difficult issues.

Improving Staff Effectiveness in Human Service Settings Lee W. Frederiksen, Anne W. Riley, 2013-04-03

An insightful volume that demonstrates how human service managers and administrators can innovatively and successfully make their agencies more effective using the principles of organizational behavior management. *Improving Staff Effectiveness in Human Service Settings* demonstrates the potential of OBM for identifying, tracking, targeting, and evaluating problems. Researchers, academicians, and practitioners examine interventions with OBM that took place in actual human service settings in response to severe organizational and staff problems. This important volume is an excellent resource brimming with well-evaluated, cost-effective staff management strategies.

Handbook of Behavior Modification with the Mentally Retarded J. L. Matson, 2013-03-14

Mental retardation has probably existed for as long as mankind has inhabited the earth. References to seemingly retarded persons appear in Greek and Roman literature. Examination of Egyptian mummies suggests that some may have suffered from diseases associated with mental retardation. Mohammed advocated feeding and housing those without reason. There is other evidence for favorable attitudes toward the retarded in early history, but attitudes varied from age to age and from country to country.

The concept of remediation did not emerge until the nineteenth century. Earlier in 1798 Itard published an account of his attempt to train the wild boy of Aveyron. A rash of efforts to habilitate retarded persons followed. Training schools were developed in Europe and the United States in the 1800s; however, these early schools did not fulfill their promise, and by the end of the nineteenth century large inhumane warehouses for retarded persons existed. The notion of habilitation through training had largely been abandoned and was not to reappear until after World War II.

Clinical Procedures for Behavior Therapy Clarence Eugene Walker, 1981 Consumer Behaviour Analysis: The behavioural economics of consumption Gordon R. Foxall, 2002 **Behavior Modification in Child Treatment** Robert M. Browning, 2017-09-29

This book is the first attempt to validate behavior modification techniques in a carefully controlled experimental treatment environment for emotionally disturbed children. Such special settings permit carefully conducted research experiments to be carried out. This is the first book to synthesize scientific and clinical approaches to human behavior, indicating that behavior modification may one day be as much an applied science as engineering or medicine. This experimental approach introduces scientific rigor to the clinical setting, as evidenced by precise measurement of behavior variables, detailed specification of treatment procedures, and the use of sophisticated experimental designs to provide objective evaluation of the effectiveness of treatment programs. In this approach, series of idiographic single subject case studies are conducted in a precise manner, with each patient subject admitted to the treatment program. The general research methodology is similar to that used in the broad area of operant conditioning, and most work reported in the book was conducted within a learning theory or behavior modification framework. Browning and Stover discuss the general problems of developing and controlling a total therapeutic milieu, presenting practical discussions of problems of data collection, decisions about treatment programs to be used, staffing problems, and documental opinion on the relative values of various treatment techniques. Throughout, attention is devoted to developing a method for answering common questions of parent, child, care worker, and professional. The authors conducted symposia on the material contained in this book at various national and regional meetings and have lectured extensively on college campuses. It is a ground-breaking study.

Handbook of Mental Illness in the Mentally Retarded F.J. Menolascino, J.A. Stark, 2012-12-06

This volume aims to provide the reader with a contemporary account of historical diagnostic treatment management, including the individual and the service systems perspectives, and training dimensions of mentally ill, mentally retarded individuals from interdisciplinary perspectives. Emphasis is placed on current and evolving aspects of this topic. The broad scope of our approach is consistent with the concepts and practices that currently typify this topical area of clinical and research activity. This volume is divided into five sections. Part I deals with the definitional aspects: the nature and incidence, the historical aspects, and a view of assessing the types of needs of mentally ill, mentally retarded individuals. Part II addresses the key issues in treatment intervention from an individual therapeutic aspect through vocational considerations, as well as the role of the parents in these helping processes. Part III focuses on

systems of service delivery ranging from inpatient and day treatment models to the delivery of services in the home at all times the emphasis is on programs that have been successful Part IV presents a modern perspective on the multiple challenges in training both mental health and mental retardation specialists as well as the critical dimension of providing a well trained cadre of paraprofessionals in both fields And finally Part V encompasses key current research perspectives as well as possible future directions for this rapidly growing area of professional interest and involvement

A Behavior Analyst's Guide to Supervising Fieldwork Tonya N. Davis, Jessica S. Akers, 2023-01-05 This guide is specifically designed for supervisors of trainees completing fieldwork requirements for the Board Certified Behavior Analyst BCBA credential to ensure a well planned and well documented fieldwork experience Supervisors have a significant responsibility to plan sequence implement and track their supervisee's fieldwork and skill acquisition This guide was created to align with the Board Certified Behavior Analyst Task List providing a structured curriculum to support the many responsibilities of a supervisor and covering a wide range of topics The book includes instructions for group and individual supervision activities homework activities for supervisees and methods of assessing skills It is designed to support the supervisor by covering all aspects key to supervision Its many additional materials are designed to maximize the supervisor's use of time and to gauge the effectiveness of their work It is evidence based and practically oriented and will benefit the supervisor as well as the trainee
