

The background of the book cover is a photograph of a forest at night. In the foreground, the dark, silhouetted branches of evergreen trees are visible. In the upper half of the image, a brilliant aurora borealis (northern lights) is visible in the dark sky, displaying vibrant green and blue streaks and curtains of light. The overall mood is serene and majestic.

Majestic Lights The Aurora In Science:

Majestic Lights, the Aurora in Science, History, and the Arts Robert H. Eather, 1980 Authoritative account written for the general reader

Observers of the Aurora Borealis in Europe Eric Chassefiere, 2023-08-15 The spectacular reappearance of the aurora borealis at the beginning of the 18th century often observed simultaneously from different observatories in Europe mobilized and federated a large community of astronomers on a European scale It encouraged them to communicate the results of their observations and in compiling exhaustive catalogs of information has helped to establish a system of the aurora borealis that can be further studied in the future according to the experimental method inherited from the previous century This book is dedicated to some of the main aurora observers in Europe and to the human institutional and philosophical context in which they evolved in the first half of the 18th century Its reading should be seen as a retrospective journey through the scholarly world of the Enlightenment during which the same scholars are frequently encountered and reencountered yet each time in different contexts or from different angles with the aim of compiling an account of the swarming of ideas and encounters that constituted the development of experimental science in this pivotal period

Sun, Earth and Sky Kenneth R. Lang, 2007-12-31 Written in a light and friendly style this lavishly illustrated book introduces the Sun and its physics and describes all aspects of the Sun's interaction with us on Earth The second edition of this book updates the popular text by providing comprehensive accounts of the most recent discoveries made by five modern solar spacecraft during the past decade It contains a number of images never before seen in print Breakthrough observations with the underground Sudbury Neutrino Observatory are also included The new edition further provides modern interpretations of ozone depletion and global warming

Prismatic Ecology Jeffrey Jerome Cohen, 2013-12-01 Emphasizing sustainability balance and the natural green dominates our thinking about ecology like no other color What about the catastrophic the disruptive the inaccessible and the excessive What of the ocean's turbulence the fecundity of excrement the solitude of an iceberg multihued contaminations Prismatic Ecology moves beyond the accustomed green readings of ecotheory and maps a colorful world of ecological possibility In a series of linked essays that span place time and discipline Jeffrey Jerome Cohen brings together writers who illustrate the vibrant worlds formed by colors Organized by the structure of a prism each chapter explores the coming into existence of nonanthropocentric ecologies Red engages sites of animal violence apocalyptic emergence and activism Maroon follows the aurora borealis to the far North and beholds in its shimmering alternative modes of world composition Chartreuse is a meditation on postsustainability and possibility within sublime excess Grey is the color of the undead Ultraviolet is a potentially lethal force that opens vistas beyond humanly known nature Featuring established and emerging scholars from varying disciplines this volume presents a collaborative imagining of what a more than green ecology offers While highlighting critical approaches not yet common within ecotheory the contributions remain diverse and cover a range of topics including materiality the inhuman and the agency of objects By

way of color Cohen guides readers through a reflection of an essentially complex and disordered universe and demonstrates the spectrum as an unfinishable totality always in excess of what a human perceives Contributors Stacy Alaimo U of Texas at Arlington Levi R Bryant Collin College Lowell Duckert West Virginia U Graham Harman American U in Cairo Bernd Herzogenrath Goethe U of Frankfurt Serenella Iovino U of Turin Italy Eileen A Joy Robert McRuer George Washington U Tobias Menely Miami U Steve Mentz St John s U New York City Timothy Morton Rice U Vin Nardizzi U of British Columbia Serpil Oppermann Hacettepe U Ankara Margaret Ronda Rutgers U Will Stockton Clemson U Allan Stoekl Penn State U Ben Woodard Julian Yates U of Delaware

An Introduction to Space Weather Mark Moldwin,2022-12-01 Our space age technology enables global communication navigation and power distribution that has given rise to our smart interconnected and spacefaring world Much of the infrastructure modern society depends on to live on Earth and to explore space is susceptible to space weather storms originating from the Sun The Second Edition of this introductory textbook is expanded to reflect our increased understanding from more than a dozen scientific missions over the past decade Updates include discussions of the rapidly expanding commercial space sector orbital debris and collision hazards our understanding of solar terrestrial connections to climate and the renewed emphasis of human exploration of the Moon and Mars It provides new learning features to help students understand the science and solve meaningful problems including some based on real world data Each chapter includes learning objectives and supplements that provide descriptions of the science and learning strategies to help students and instructors alike

Sea of Glory Nathaniel Philbrick,2004-10-26 A treasure of a book David McCullough The harrowing story of a pathbreaking naval expedition that set out to map the entire Pacific Ocean dwarfing Lewis and Clark with its discoveries from the New York Times bestselling author of Valiant Ambition and In the Hurricane s Eye A New York Times Notable Book America s first frontier was not the West it was the sea and no one writes more eloquently about that watery wilderness than Nathaniel Philbrick In his bestselling In the Heart of the Sea Philbrick probed the nightmarish dangers of the vast Pacific Now in an epic sea adventure he writes about one of the most ambitious voyages of discovery the Western world has ever seen the U S Exploring Expedition of 1838 1842 On a scale that dwarfed the journey of Lewis and Clark six magnificent sailing vessels and a crew of hundreds set out to map the entire Pacific Ocean and ended up naming the newly discovered continent of Antarctica collecting what would become the basis of the Smithsonian Institution Combining spellbinding human drama and meticulous research Philbrick reconstructs the dark saga of the voyage to show why instead of being celebrated and revered as that of Lewis and Clark it has until now been relegated to a footnote in the national memory Winner of the Theodore and Franklin D Roosevelt Naval History Prize

Introduction to Space Physics Margaret G. Kivelson,Christopher T. Russell,1995-04-28 All aspects of space plasmas in the

Solar System are introduced and explored in this text for senior undergraduate and graduate students Introduction to Space Physics provides a broad yet selective treatment of the complex interactions of the ionized gases of the solar terrestrial environment The book includes extensive discussion of the Sun and solar wind the magnetized and unmagnetized planets and the fundamental processes of space plasmas including shocks plasma waves ULF waves wave particle interactions and auroral processes The text devotes particular attention to space plasma observations and integrates these with phenomenological and theoretical interpretations Highly coordinated chapters written by experts in their fields combine to provide a comprehensive introduction to space physics Based on an advanced undergraduate and graduate course presented in the Department of Earth and Space Sciences at the University of California Los Angeles the text will be valuable to both students and professionals in the field

Crossing Borders Michelle Ann Miller, Michael Douglass, Matthias Garschagen, 2017-12-06 This multidisciplinary book examines the diverse ways in which environmental disasters with compounding impacts are being governed as they traverse sovereign territories across rapidly urbanising societies in Asia and the Pacific Combining theoretical advances with contextually rich studies the book examines efforts to tackle the complexities of cross border environmental governance In an urban age in which disasters are not easily contained within neatly delineated jurisdictions both in terms of their interconnected causalities and their cascading effects governance structures and mechanisms are faced with major challenges related to cooperation collaboration and information sharing This book helps bridge the gap between theory and practice by offering fresh insights and contrasting explanations for variations in transboundary disaster governance regimes among urbanising populations in the Asia Pacific

Alfvén Waves and Static Fields in Magnetosphere/ionosphere Coupling David J. Knudsen, 1990 Perturbation electric and magnetic fields carry in excess of 10^{10} to 10^{12} W of electrical power between the magnetosphere and high latitude ionosphere Most of this power is generated by the solar wind The ionosphere at large spatial and temporal scales acts as a dissipative slab which can be characterized by its height integrated Pedersen conductivity σ_p so that the power flux into the ionosphere due to a quasi static electric field E is given by $\sigma_p E^2$ The energy transferred to the ionosphere by time varying electromagnetic fields in the form of Alfvén waves is more difficult to calculate because density and conductivity gradients can reflect energy Thus field resonances and standing wave patterns affect the magnitude and altitude distribution of electrical energy dissipation We use a numerical model to calculate the frequency dependent electric field reflection coefficient of the ionosphere and show that the ionosphere does not behave as a simple resistive slab for electric field time scales less than a few seconds Time variation of spacecraft measured high latitude electric and perturbation magnetic fields is difficult to distinguish from spatial structuring that has been Doppler shifted to a non zero frequency in the spacecraft frame However by calculating the frequency dependent amplitude and phase relations between fluctuating electric and magnetic fields we are able to show that low frequency fields
