Hybrid Photography

Sara Hillnhuetter, Stefanie Klamm, Friedrich Tietjen, 2021-04-07 This book explores the territories where manual graphic photographic and digital techniques interfere and interlace in sciences and humanities It operates on the assumption that when photography was introduced it did not oust other methods of image production but rather became part of ever more specialized and sophisticated technologies of representation The epistemological break commonly set with the advent of photography since the nineteenth century has probably been triggered by photographic techniques but certainly owes much to the availability of a plethora of hybrid media media that influence the relation of sciences humanities and their methods and subjects This book will be of interest to scholars in art and visual culture photography and history of photography

Photography Theory James Elkins, 2013-10-18 Photography Theory presents forty of the world's most active art historians and theorists including Victor Burgin, Joel Snyder, Rosalind Krauss, Alan Trachtenberg, Geoffrey Batchen, Carol Squiers, Margaret Iversen and Abigail Solomon Godeau in animated debate on the nature of photography. Photography has been around for nearly two centuries but we are no closer to understanding what it is. For some people a photograph is an optically accurate impression of the world; for others it is mainly a way of remembering people and places. Some view it as a sign of bourgeois life, a kind of addiction of the middle class, whilst others see it as a troublesome interloper that has confused people's ideas of reality and fine art to the point that they have difficulty even defining what a photograph is. For some the whole question of finding photography's nature is itself misguided from the beginning. This provocative second volume in the Routledge The Art Seminar series presents not one but many answers to the question: what makes a photograph a photograph.

Photography Liz Wells, 2021-07-08 Now in its sixth edition, this seminal textbook examines key debates in photographic theory and places them in their social and political contexts. Written especially for students in further and higher education and for introductory college courses, it provides a coherent introduction to the nature of photographic seeing. Individual chapters cover: Key debates in photographic theory and history; Documentary photography and photojournalism; Personal and popular photography; Photography and the human body; Photography and commodity culture; Photography as art. This revised and updated edition includes new case studies on topics such as Black Lives Matter and the racialised body, the MeToo movement, materialism and embodiment, nation branding and an extended critical discussion of landscape as genre. Illustrated with over 100 colour and black and white photographs, it features work from Bill Brandt, Susan Derges, Rineke Dijkstra, Fran Herbello, Hannah Hoch, Mari Katayama, Sant Khalsa, Karen Knorr, Dorothea Lange, Susan Meiselas, Lee Miller, Ingrid Pollard, Jacob Riis, Alexander Rodchenko, Andres Serrano, Cindy Sherman and Jeff Wall. A fully updated resource, information including guides to public archives and useful websites, full glossary of terms and a comprehensive bibliography, plus additional resources at routledgetextbooks.com/textbooks 9780367222758 make this an ideal introduction to the field.
