Medvedev Papers The Plight Of Soviet Sci:

The Social Context Of Soviet Science Linda L Lubrano, Susan Gross Solomon, 2019-06-13 From its very beginnings Western scholarly writing on Soviet science has been largely contextual in orientation with particular attention given to the institutional and political setting of science in Russian and Soviet history This book moves that tradition in a new direction by focusing more closely on the social conditions of the research process

Scientific Communication Across the Iron Curtain Christopher D. Hollings, 2015-12-12 This monograph provides a concise introduction to the tangled issues of communication between Russian and Western scientists during the Cold War It details the extent to which mid twentieth century researchers and practitioners were able to communicate with their counterparts on the opposite side of the Iron Curtain Drawing upon evidence from a range of disciplines a decade by decade account is first given of the varying levels of contact that existed via private correspondence and conference attendance Next the book examines the exchange of publications and the availability of one side's work in the libraries of the other It then goes on to compare general language abilities on opposite sides of the Iron Curtain with comments on efforts in the West to learn Russian and the systematic translation of Russian work In the end author Christopher Hollings argues that physical accessibility was generally good in both directions but that Western scientists were afflicted by greater linguistic difficulties than their Soviet counterparts whose major problems were bureaucratic in nature This volume will be of interest to historians of Cold War science particularly those who study communications and language issues In addition it will be an ideal starting point for anyone looking to know more about this fascinating area

Mathematics across the Iron Curtain Christopher Hollings, 2014-07-16 The theory of semigroups is a relatively young branch of mathematics with most of the major results having appeared after the Second World War This book describes the evolution of algebraic semigroup theory from its earliest origins to the establishment of a full fledged theory Semigroup theory might be termed Cold War mathematics because of the time during which it developed There were thriving schools on both sides of the Iron Curtain although the two

sides were not always able to communicate with each other or even gain access to the other's publications. A major theme of this book is the comparison of the approaches to the subject of mathematicians in East and West and the study of the extent to which contact between the two sides was possible. **Russia and Eastern Europe, 1789-1985** Raymond Pearson, 1989

First published in 1986, *Soviet Fiction since Stalin* presents a comprehensive overview of the literature of the post-Stalin period in the Soviet Union. The rapid advances in science and technology in these years are reflected in the themes of many of the major novelists: Pasternak, Solzhenitsyn, Sinyavsky, Daniel, and Grossman, and scientific subjects frequently offer a vehicle for the exploration of the wider socio-political, moral, and philosophical ideas. As the period advances, however, literature becomes the first medium in which to express mistrust of scientific advance and hence indirectly of Soviet policy as a whole. Rosalind J. Marsh uses a broad definition of science which enables her to cover topics ranging from de-Stalinization, nationalism, and anti-Semitism in science to Lysenko and scientific charlatanism, the Soviet rejection of relativity theory and quantum mechanics, the atom bomb, and also such general problems as secrecy, careerism, and bureaucracy. The bulk of the book concentrates on the Khrushchev years, but there is also plentiful discussion of more recent writing such as that of Zinoviev and Voinovich. This book will be of interest to students and researchers of Soviet literature, Russian literature, and literature in general. **The Cambridge History of Russia: Volume 3, The Twentieth Century** Maureen Perrie, Ronald Grigor Suny, 2006-11-02

Marsh, 1995-08-09 Since 1985, Russia has experienced a dramatic cultural and social revolution. Rosalind Marsh presents the first study encompassing one important aspect of this process: that is, the major part which literature has played in reassessing the past, transforming public opinion, and hence in promoting political change in Russia. She provides a chronology of literary politics in this period and analyses the content and influence of newly published literature on a variety of historical themes, including Stalin and Stalinism, Lenin, the Civil War, the February and October Revolutions, and the fall of Tsarism. She explores the heated moral and political debates inspired among different sections of Russian society by the

works of many authors including Rybakov Solzhenitsyn Grossman Bunin and Gorky **Problems of Communism** ,1972
