Meeting Of East West An Inquiry:

The Meeting of East and West Filmer S. C. Northrop, 1952 *The Logic of Unity* Hōsaku Matsuo, 1987-01-01 This clear and elegant translation reveals how a modern Japanese thinker dared to show the basic flaw of Western epistemology In unmasking this limitation Matsuo presents an Eastern view of a unified experience and provides an epistemological basis for comparative philosophy Matsuo notes that while early Greek thought began by focusing on the right counsel Know thyself since then Western thought has been influenced by empiricistic analysis fired by the rise of scientific philosophy The author thus turns to Eastern epistemology in particular Buddhist thought for clues to the unified experience The seminal idea of emptiness nyat plays a distinct role in this discovery The concept of emptiness encompasses the whole dimension of perception where there is no room for separation into mind and body and or any other form of dichotomy Once it is known that the total dimension of perception the logic of unity functions in each and every person then and only then can the field of comparative thought and philosophy be cleared of all preconceptions and move into a more fruitful exchange of ideas Until such a time Matsuo claims we are hopelessly engaged in merely refining the epistemological process without ever being able to understand the very basis of intelligence The Epistemology of Comparative Philosophy Joseph Kaipayil, 1995

Intransitive Encounter Nan Da, 2018-12-25 Why should the earliest literary encounters between China and the United States and their critical interpretation matter now How can they help us describe cultural exchanges in which nothing substantial is exchanged at least not in ways that can easily be tracked All sorts of literary meetings took place between China and the United States in the nineteenth and early twentieth centuries involving an unlikely array of figures including canonical Americans such as Washington Irving Ralph Waldo Emerson and Henry Wadsworth Longfellow Chinese writers Qiu Jin and Dong Xun and Asian American writers like Yung Wing and Edith Eaton Yet present day interpretations of these interactions often read too much into their significance or mistake their nature missing their particularities or limits in the quest to find evidence of cosmopolitanism or transnational hybridity In *Intransitive Encounter* Nan Z Da carefully re creates these transpacific interactions plying literary and social theory to highlight their various expressions of indifference toward synthesis interpollination and convergence Da proposes that interpretation trained on such recessive moments and minimal adjustments can light a path for Sino U S relations going forward offering neither a geopolitical showdown nor a celebration of hybridity but the possibility of self contained cross cultural encounters that do not have to confess to the fact of their having taken place *Intransitive Encounter* is an unconventional and theoretically rich reflection on how we ought to interpret global interactions and imaginings that do not fit the patterns proclaimed by contemporary literary studies Teaching Mysticism William B. Parsons, 2011-12-16 The term mysticism has never been consistently defined or employed either in religious traditions or in academic discourse The essays in this volume offer ways of defining what mysticism is as well as methods for grappling with its complexity in a classroom Jung and Steiner Gerhard Wehr, 2003-02 All descriptions of the

past are in the present therefore history tells our descendants more about us than it does about the imaginary creatures we like to call our ancestors All of which is only another way of saying that the past and the future do not exist nevertheless we need these narrative fictions for we gain knowledge by looking backward at patterns and forward in anticipation of the results of our actions William Irwin Thompson With the threat of global climate change a looming mass extinction of species and increasingly complex and volatile geopolitical relations the entire Earth Community has entered a most critical phase of what the author describes as the Planetary Era This era began some five hundred years ago with the conquest of the Americas and the Copernican revolution in cosmology but it is just now becoming a defining feature of human consciousness on a global scale How did the Planetary Era come about and why was it initiated in the European West What elements in the evolution of the Western worldview might contribute to the actualization of a sustainable planetary culture Drawing from a wide range of panoptic or big picture thinkers from Hegel Teilhard Jaspers and Campbell to Ken Wilber Richard Tarnas and Edgar Morin among others the author answers such questions and presents his own synthetic theory of the evolution of consciousness leading to the birth and transformation of the Planetary Era Beginning with a consideration of the fundamental pattern of world history Sean Kelly reveals the role of a Great Code and the turning of a tightening spiral in the evolution of the past two millennia of Western and increasingly planetary consciousness Along with a vision of the path that has lead to our vexed and complex present the author offers reason to hope that we are on the threshold of a new countercultural resurgence a new planetary wisdom culture that could signal the homecoming for which our troubled world so desperately longs **The Meeting of East and West** Filmer Stuart Cuckow Northrop,1958 [Man East and West](#)

Howard L. Parsons,1975 **Methodologies of Comparative Philosophy** Robert W. Smid,2010-07-02 What is comparative philosophy This question is ultimately a methodological one according to this much needed book The cultivation of area studies in diverse traditions has opened up opportunities for cross cultural understanding that have rarely existed before and comparative philosophy is a rapidly emerging area of inquiry Yet surprisingly little has been written on comparative methodology in philosophy Of course there is much at stake in how we compare things how comparison is done determines what comparison is Author Robert W Smid provides a critical review of four of the most influential comparative methodologies within the American pragmatist and process philosophical traditions those of William Ernest Hocking F S C Northrop Robert Cummings Neville and David L Hall in collaboration with Roger T Ames Discussing the history of each methodology s development and critically assessing its strengths and weaknesses Smid demonstrates that it is possible to compare methods as well as traditions and encourages those interested to join the contemporary conversation
