Professor Colin Groves whose work has had an enormous impact on this field Recent research into that somewhat unique  
species we call humankind through the theoretical and conceptual approaches afforded by the discipline of biological  
anthropology is showcased The focus is on the evolution of the human species the behaviour of primates and other species  
and how humans affect the distribution and abundance of other species through anthropogenic impact Weaving together  
these three key themes through the considerable influence of Colin Groves provides glimpses of how changes in taxonomic
