When Your Mate is No Longer Significant! Richard L. Sartore, 2001-04-30 Although the major highlight of this writing is on men and women in modern marital commitments I also offer recommendations applying to couples looking to improve their lives when a new significant person appears In certain instances despite conscientious efforts beneficial coupling does not inevitably follow However my foremost concern is with strengthening weakened ties by identifying problems and taking steps offering healing potential When things go wrong between two individuals the relationship is jeopardized This happens frequently with young people and those in marriages and romantic affairs The signs that a relationship is in trouble are not always obvious It is therefore crucial to recognize red flags that manifest warnings At times the signs look clear but we fail to notice This writing cites behaviors that threaten a potentially sound relationship Moreover the book addresses what can be done and lists possible resources that help to heal a splintered pair I would eagerly like to declare that all relationships can be salvaged but this is simply not the case The book focuses on traditional relationships but there are alternatives Alternatives include single individuals in a non marital state homosexual males and females extended families communes group marriages and so forth Strong relationships exist and fall under the closeness of a loving relationship Certainly marriage options are not new History clearly demonstrates cultural varieties The title WHEN YOUR SIGNIFICANT OTHER IS NO LONGER SIGNIFICANT is not intended to illustrate a therapeutic process involved with ameliorating relationships Rather it discusses danger signals possibly warranting professional help When you first commit to the love of your life your mate is the significant other No one is as sensitive understanding humorous and loving The match was undoubtedly made in heaven That's the way we would like things to go for life But what happens Where did the loving relationship problems begin Did you even know a serious problem existed No one has a magic bullet or guarantee But there are common sense love approaches

Families and Mental Retardation Diane Marsh, 1992-05-27 Traditional pathology models do not provide a satisfactory framework for professional practice with families of people with mental retardation Families and Mental Retardation is written from the perspective of a

competence paradigm for professional practice which offers a constructive alternative to the more prevalent pathology models of the past The goal of professional practice is to empower families in coping with the catastrophic stressor of mental retardation Such an approach recognizes the strengths and resources of families which have often been minimized in the past and fosters new collaborative modes of family professional relationships Unique features include a consideration of life span and family system and subsystem perspectives as well as the inclusion of powerful personal accounts of family members The volume is likely to be of special value to mental health and health care professionals who often receive little training in mental retardation or family professional relations and who tend to apply a pathology model In contrast a competence paradigm is more prevalent in education
