Meeting The Technology Management Challenges In The Automotive Industry:

Meeting the Technology Management Challenges in the Automotive Industry Ashok Boghani, Andrew Brown, 2000-02-25 In today's automotive industry developing new products and systems is more important than ever before. Central to the creation of innovative products is technology development. However, managing technology development has often proven to be a difficult task for many American firms. This book provides instruction on how to make technology management more effective and efficient. It discusses several ways to leverage technology development to get more value with fewer resources. Alignment, globalization, centralization, decentralization, sourcing, co-development, technology intelligence, and intellectual property are all extensively covered. Advice is provided on how to ease implementation of these solutions, and several examples of the successes enjoyed by best practice companies are detailed. Chapters cover Global Trends in Automotive Systems Management of Technology Challenges in Automotive Technology Management Meeting Technology Management Challenges Best Practice Case Studies. **Meeting the Technology Management Challenges in the Automotive Industry**, 19?? The Offshoring of Engineering National Academy of Engineering, Committee on the Offshoring of Engineering, 2008-08-14 The engineering enterprise is a pillar of U.S. national and homeland security, economic vitality, and innovation. But many engineering tasks can now be performed anywhere in the world. The emergence of offshoring, the transfer of work from the United States to affiliated and unaffiliated entities abroad, has raised concerns about the impacts of globalization. The Offshoring of Engineering helps to answer many questions about the scope, composition, and motivation for offshoring and considers the implications for the future of U.S. engineering practice, labor markets, education, and research. This book examines trends and impacts from a broad perspective and in six specific industries: software, semiconductors, personal computer manufacturing, construction, engineering, and services, automobiles, and pharmaceuticals. The Offshoring of Engineering will be of great interest to engineers, engineering professors and deans, and policy makers, as well as people outside the engineering community who are concerned with sustaining and strengthening U.S. engineering capabilities in support of homeland security, economic vitality, and innovation. *Challenges of Information Technology Management in the 21st Century* Information Resources Management Association.
