 Wouters, Michael Dunning, 2019-01-31 Over the last century and a half manners and formalities in the West have become less
 status ridden stiff and rigid Debates around Norbert Elias theory of civilising processes gave rise to questions of a change in
 direction of these patterns The concept of informalisation which describes these transformations was first used to analyse the
 tumultuous changes of the 1960s and 1970s This increasing informality leniency and flexibility comes hand in hand with a
 growing demand on individuals to self regulate their emotions This book will stimulate debate around the changes in the
 standards of manners and emotion regulation and will generate new avenues of enquiry that focus on issues involving
 informalisation The chapters shed light on a variety of such moral and political issues over the last 150 years offering a new
 and broader scope on the present social condition of humanity Civilisation and Informalisation will be an important addition
