**In Good Company** Bede Benjamin Bidlack, 2015-02-04 In *Good Company* answers a question that has confounded Christian theologians What is the nature of the body that will enjoy resurrection at the end of time In this exciting work of comparative theology Bede Benjamin Bidlack derives a theory of the body from the French Jesuit Pierre Teilhard de Chardin by putting him in dialogue with the Song Dynasty Daoist Xiao Yingsou In addition to its contribution to comparative theology In *Good Company* offers the first translation of the preface of Xiao s commentary on the Duren jing in a Western language as well as a careful explication of the provocative mountain diagram therein Bidlack presents an original contribution for both scholars of Christian theology and Chinese religion An excellent example of comparative theology Bede Bidlack s *In Good Company* demonstrates how certain lacunae in one tradition may be addressed by drawing on resources from another religion Having identified a neglect of the body in the work of Pierre Teilhard de Chardin and in much of the Christian tradition of divinization Bidlack discusses the work of Daoist scholar Xiao Yingsou as a possible source of inspiration and theological imagination Catherine Cornille Newton College Alumnae Chair Professor of Comparative Theology Boston College In *Good Company* takes comparative theology to a new level it not only places Daoism front and center but also opens Christian spirituality to a wider dimension Concerned with the two core themes of the body and personal divinization or resurrection the book centers on the work of two influential thinkers in their traditions Teilhard de Chardin and Xiao Yingsou Although 800 years apart their visions of the body as the means to ultimate fulfillment in close relation to divinity and the cosmos as a whole powerfully enhance each other as do their understanding of the intricate process of personal divinization The book is challenging in its outlook unsettling in its destabilization of terms and brilliant in its interweaving of the two traditions A must for anyone concerned with the new global environment of religious pluralism and the ongoing process of interreligious dialogue Livia Kohn Professor Emerita of Religion East Asian Studies Boston University

**On the Origin of Consciousness** Scott D. G. Ventureyra, 2018-11-29 Have you ever thought about how self consciousness self awareness originated in the universe Understanding consciousness is one of the toughest nuts to

crack In recent years scientists and philosophers have attempted to provide an answer to this mystery The reason for this is simply because it cannot be confined to solely a materialistic interpretation of the world Some scientific materialists have suggested that consciousness is merely an illusion in order to insulate their worldviews Yet consciousness is the most fundamental thing we know even more so than the external world since we require it to perceive or think about anything Without it reasoning would be impossible Dr Scott Ventureyra in this ground breaking book explores the idea of the Christian God and Creation in order to tackle this most difficult question He demonstrates that theology has something significant to offer in reflection of how consciousness originated in the universe He also makes a modest claim that the Christian conception of God and Creation provide a plausible account for the origin of self consciousness He integrates philosophy theology and science in an innovative way to embark on this exploration
