Megalithic Brittany:

Megalithic Brittany Aubrey Burl,1985-01-01 Describes standing stones chambered tombs and stone circles discusses the history of each site and considers why they were built Statements in Stone Mark Patton,2002-11 Statements in Stone is based on the most recent and controversial theoretical perspectives in archaeology It will be of great interest to students of archaeology and anthropology **Voices Out of Stone** Carolyn North,Natasha Hoffman,2010 The wisdom of the standing stones of Carnac revealed **Exploring Megalithic Europe** Julian Heath,2019-11-07 Abundant prehistoric remains survive in the wide landscapes of Europe but none are arguably as fascinating or awe inspiring as the megalithic after the Greek megas great and lithos stone monuments built by the people who lived here during the three hugely important periods of European prehistory known respectively as the Neolithic the Copper Age and the Bronze Age These huge prehistoric stone structures can still be found scattered in their thousands across Europe and provide a tentative but evocative link to their builders and to Europe s distant past From the Mediterranean islands to the colder climes of Scandinavia Exploring Megalithic Europe takes readers to many European countries examining both famous and lesser known megalithic monuments and looking at what insights these remarkable reminders of prehistoric life may provide into the ancient communities responsible for their construction **Megalithic Remains in Britain and Brittany** Alexander Thom,Archibald Stevenson Thom,1978 Megalithic Remains in Britain and Brittany **The Megaliths of Vera Island in the Southern Urals** Stanislav Grigoriev,Yulia Vasina,2019-07-11 The largest and brightest megalithic complex in Russia s Ural Mountains is located on Vera Island represented by three chambered megaliths and sanctuaries of the Eneolithic period mid 4th 3rd millennium BC The oldest samples of stone sculpture in the Urals have been revealed within this complex **Time and Stone: The Emergence and Development of Megaliths and Megalithic Societies in Europe** Bettina Schulz Paulsson,2017-09-15 This analysis is concerned with the dating of megaliths in Europe and is based on 2410 available radiocarbon results and the application of a Bayesian statistical framework It is so far the largest existing attempt to establish a supra regional synthesis on the emergence and development of megaliths in Europe **The Megalithic Architectures of Europe** Luc Laporte,Chris Scarre,2015-12-31 Megalithic monuments are among the most striking remains of the Neolithic period of northern and western Europe and are scattered across landscapes from Pomerania to Portugal Antiquarians and archaeologists early recognized the family resemblance of the different groups of tombs attributing them to maritime peoples moving along the western seaways More recent research sees them rather as the product of established early farming communities in their individual regions Yet the diversity of the tombs their chronologies and their varied cultural contexts complicates any straightforward understanding of their origins and distribution Megalithic Architectures provides new insight by focusing on the construction and design of European megalithic tombs on the tomb as an architectural project It shows how much is to be learned from detailed attention to the stages and the techniques through

which tombs were built modified and enlarged and often intentionally dismantled or decommissioned The large slabs that were employed often unshaped may suggest an opportunistic approach by the Neolithic builders but this was clearly far from the case Each building project was unique and detailed study of individual sites exposes the way in which tombs were built as architectural social and symbolic undertakings Alongside the manner in which the materials were used it reveals a store of knowledge that sometimes differed considerably from one structure to another even between contemporary monuments within a single region The volume brings together regional specialists from Scandinavia Germany Britain France Belgium and Iberia to offer a series of uniquely authoritative studies Results of recent fieldwork are fully incorporated and much of the material is published here for the first time in English It provides an invaluable overview of the current state of research on European megalithic tombs
