Megaliths, Myths and Men Peter Lancaster Brown, 2000-01-01 Fascinating study of early astronomical knowledge through the interpretation of such ancient monuments as Stonehenge Carnac other megalithic sites Over 140 photos maps illustrations Fascinating Publishers Weekly *Megaliths, Myths and Men* Peter Lancaster Brown, 2013-01-23 Fascinating study of early astronomical knowledge through the interpretation of such ancient monuments as Stonehenge Carnac other megalithic sites Over 140 photos maps illustrations Fascinating Publishers Weekly [Megaliths, Myths, and Men](#) Peter H. Brown, Peter Lancaster Brown, 1978-01-01 **Exploring Archaeoastronomy** Liz Henty, 2022-03-24 Archaeoastronomy and archaeology are two distinct fields of study which examine the cultural aspect of societies but from different perspectives Archaeoastronomy seeks to discover how the impact of the skyscape is materialized in culture by alignments to celestial events or sky based symbolism yet by contrast archaeology's approach examines all aspects of culture but rarely considers the sky Despite this omission archaeology is the dominant discipline while archaeoastronomy is relegated to the sidelines The reasons for archaeoastronomy's marginalized status may be found by assessing its history For such an exploration to be useful archaeoastronomy cannot just be investigated in a vacuum but must be contextualized by exploring other contemporaneous developments particularly in archaeology On the periphery of both there are various strands of esoteric thought and pseudoscientific theories which paint an alternative view of monumental remains and these also play a part in the background The discipline of archaeology has had an unbroken lineage from the late 19th century to the present On the other hand archaeoastronomy has not been consistently titled having adopted various different names such as alignment studies orientation theory astro archaeology megalithic science archaeotopography archaeoastronomy and cultural astronomy names which depict variants of its methods and theory sometimes in tandem with those of archaeology and sometimes in opposition Similarly its academic status has always been unclear so to bring it closer to archaeology there was a proposal in 2015 to integrate archaeoastronomy research with that of archaeology and call it skyscape archaeology This volume will examine how all these different variants came about and consider archaeoastronomy's often troubled relationship with archaeology and its appropriation by esotericism to shed light on its position today **Hermeneutics of Megaliths** Costas Maritsas, 2015-09-10 Hermeneutics of Megaliths offers provocative and unique insights into the cultural interpretation of megaliths While megalithic culture has been the subject of detailed study for a number of years this book introduces a new cultural mode of interpretation that will help in gaining a greater understanding of this extremely important epoch of human history As this volume shows the necessity behind the creation of megaliths is a result of the transition from natural selection to civilization It also emphasizes the original purpose of megalithic constructions such as dolmens menhirs cromlechs and effigy mounds analysing and exploring popular existing hypotheses In addition certain megalithic structures are shown to be scenes of primordial theatrical performances with the struggle for survival being

replaced by the symbolic combat of dance This book provides the reader with details of under researched and lesser known megaliths It also explores the organic ties connecting megaliths origin their history and their contemporary existence in various sometimes rare forms The main theoretical concepts of the book are illustrated by means of well known and new material from a number of different cultures giving the reader the opportunity to view a wide range of interesting photographs from Machu Picchu Bulgaria Gobekli Tepe Stonehenge and Korea As such this book will serve as useful and fascinating reading material for anyone with an interest in the field of cultural studies The Myths of Greece and Rome H. and Neolithic Architecture John Hill, 2024-03-04 Our understanding of the construction processes involved with British Neolithic architecture needs further investigation The people were preliterate and there is no archaeological evidence of written or pictorial information regarding construction So how could they build complex monuments like Stonehenge without a plan This book argues that the Neolithic builders used rudimentary techniques to plan before building their monuments circa 4000 2500 BC essentially using ropes to set out the physical design of any structure they intended to build whilst finger reckoning numeracy dictated how their measured ropes were folded to position the monument's features Finally they used the sun's shadow at midday to achieve orientation To support this premise the book offers both the results of the author's rope experiments and instructions for repeating them Importantly this form of experimental archaeology delivers a unique approach for understanding the nature of complex Neolithic architecture Essentially the book explains the mental processes involved between design and construction
